GODOX AD100Pro II Flash

The Godox AD100Pro II is a compact 100 Ws outdoor flash equipped with TTL support, HSS up to 1/8000 s, an active cooling system, and a high-capacity battery capable of delivering up to approximately 490 full-power flashes. The model is compatible with the Godox X 2.4 GHz wireless system, offers smooth power adjustment ranging from 1/1 to 1/256, a fast recharge time of 0.01 to 1.5 seconds, and a built-in 28–85 mm zoom. Thanks to its compact design, LED modeling light, and compatibility with numerous light modifiers, it's ideal for both studio sessions and outdoor photography.

High Power in a Compact Design

The Godox AD100Pro II was designed for photographers who need a powerful light source without having to use large and heavy studio lights. Its compact housing means the unit fits easily into a camera bag and is ideal for field work. Despite its small size, the flash offers 100 Ws of power, —

allowing you to effectively illuminate your subject in a wide variety of conditions. This makes the model ideal for portrait, product, and event photography, as well as on-location shoots.

More Efficient Cooling and Stable Operation

The new version of the flash is equipped with a redesigned active cooling system that enhances comfort during long photo sessions. It allows you to fire 60 to 100 full-power flashes without needing to take breaks to let the unit cool down. Constant flash energy ensures repeatable results and makes it easier to maintain consistent lighting throughout a series of photos. This feature will be particularly appreciated by photographers conducting intensive sessions or shooting dynamic events.

Better Light Control

The flash is equipped with a built-in zoom ranging from 28 to 85 mm, which allows for precise adjustment of the light spread angle to suit the scene being photographed. The improved optical system provides more even and soft lighting, making it even easier to achieve natural effects. An additional convenience is the LED modeling light, which allows you to assess the direction and character of the light before taking the photo. This translates to faster workflow and greater control over the final result.

Extensive Expansion Options

The magnetic head is compatible with Godox accessories from the AK-R1, AK-R21, and AK-R22 series, allowing you to quickly adjust the lighting characteristics to suit your shots. When used with the S2 or S3 mount, the flash is also compatible with modifiers featuring a Bowens mount. This allows you to use a wide range of softboxes, reflectors, and other accessories suitable for both studio and outdoor photography. Such broad compatibility makes the AD100Pro II easy to adapt to various photography styles.

High-Capacity Battery and Fast Charging

The Godox AD100Pro II is equipped with a 2850 mAh battery, which allows for approximately 490 full-power flashes on a single charge. This capacity enables comfortable shooting even during long photo sessions without the need for frequent recharging. The USB-C port ensures convenient
