Freewell 1.33X Anamorphic Lens with 17mm Mount

The Freewell 1.33X anamorphic lens with a 17mm mount lets you achieve a truly cinematic effect without needing a professional camera. With a 1.33x compression ratio, you can record footage in the cinematic 2.35:1 aspect ratio, which gives your shots a widescreen, dynamic look. The lens generates characteristic light streaks and striking background blur (bokeh), giving every recording the stunning depth and style known from film productions.

Precision and ease of use

The integrated 17 mm mount ensures a stable and secure attachment of the lens to your smartphone, while the built-in level makes it easy to frame shots precisely. This solution will be particularly appreciated by video creators who want to ensure perfect image leveling right from the

recording stage. Support for the desqueeze function in third-party apps allows you to quickly convert footage to the correct aspect ratio while preserving the full cinematic effect.

Versatility and professional results

The lens was designed with broad compatibility in mind. It works with many smartphone models, including iPhone, Samsung, and other mobile devices. It is the world’s first neutral anamorphic lens for smartphones that reacts to light naturally, generating realistic flares and elevating the quality of your recordings to a level comparable to professional productions. This allows you to create impressive content anywhere—without compromise.

Thoughtful details that make a difference

Freewell has prioritized both image quality and the comfort of everyday use. The included front and rear lens caps are designed to snap together, ensuring they always stay together and won’t get lost during transport. It’s a small but incredibly practical detail that makes using the lens even more convenient, whether you’re recording at home or on location.

Manufacturer	Freewell
Model	FW-PROANM-1.33X
Dimensions	Ø64.3 × 34.5 mm (including front and rear caps)
Bayonet mount	17 mm
Filter thread	58 mm
