R753

Meet the GENESIS Tin 300 - a charger compatible with the standard version of the PS5 console, with which you can easily replenish the DualSense and DualSense Edge gamepads. Simple, fully collapsible design, good quality materials and timeless design - be ready to play at any time.

EVEN MORE CONVENIENT CHARGING

Want an even more convenient way to replenish the power of your gamepads? Reach for the GENESIS Tin 300. This compact charger is easy to use. All you have to do is plug it into the console's USB-C port, unfold it and place your controller on it. The charging process will start automatically. It's really simple.

THINKING ABOUT DUALSENSE and DUALSENSE EDGE CONTROLLERS.

We created the GENESIS Tin 300 with user comfort and safety in mind. Its distinctive grooves and shape make both DualSense and DualSense Edge gamepads rest fully stable on it. With GENESIS Tin 300, charging is not only easier, but also safer.

FOLDING DESIGN

Not using the charger? You don't need to unplug it from your console's port. All you need to do is fold

it with a flick of the wrist. This will save you time and protect your console and charger from accidental damage.

FITTED TO THE CONSOLE

Classic black and white color scheme and a subtle accent in the form of the brand's logo. GENESIS Tin 300 is a model that you can easily match with your console. What's more - its minimalist design will ensure that it won't take up extra space in your space and eliminate the need for cables, making your workstation aesthetically pleasing and cohesive.
