more flexibility when it comes to their workstation layout and device connections. For single extended display setups, the dock’s HDMI 2.1 port and the USB 3.2 Gen 2 Type-C1 port (with DisplayPort 1.4 support) offers a maximum output of 4K resolution at 144 Hz, or 8K at 30 Hz.

Charging Capability

Charge fast, charge in tandem

ASUS Dual 4K USB-C Dock supports USB Power Delivery of up to 100 watts. That’s enough to rapidly charge almost any modern USB-C® device, including the latest ultraportable notebooks. In addition, a USB-A port offers up to 10.5-watt output, enabling two devices to be charged simultaneously.

Fast Data Transfer

Superfast file transfers

Both the USB-A and USB-C® on ASUS Dual 4K USB-C Dock support data transfers of up to 10 Gbps, which is up to 4x faster than previous-generation specs. Large files and folders will flow in moments, rather than minutes.

Durability

Superior durability and stability

For improved strength and resilience, ASUS Dual 4K USB-C Dock has a connecting coaxial cable that’s shielded by an aluminum braid that provides up to 1.7x better performance than traditional cables. High-quality construction minimizes the risk of signal attenuation, reducing interference by up to 60% while ensuring rock-solid connections. The cable is also supremely tough and has been laboratory tested to withstand up to 10,000 bends and twists.

The ASUS Dual 4K USB-C Dock has also passed WWCB certification, ensuring it meets international quality and compatibility standards.
