ROG Strix X870E-E Gaming WiFi7 Neo

The ROG Strix X870E-E Gaming WiFi7 Neo is designed to unleash the power of AMD Ryzen™ 9000 Series processors. Enhancements such as PCIe® lane optimization deliver higher speeds to five M.2 slots, all of which feature Q-Release for EZ DIY installation, just like the PCIe 5.0 x16 slot. AI Cache Boost optimizes CPU cache and memory pathways to accelerate AI workloads, while NitroPath DRAM Technology and a server-grade low-etch PCB enhance signal integrity for more stable DDR5 tuning and greater overclocking headroom. A spacious 64MB BIOS chip delivers broad AM5 CPU compatibility, and the redesigned BIOS interface offers a smoother user experience.
