Petkit YumShare SOLO 2 Pet Feeder

The Petkit YumShare SOLO 2 is a smart automatic pet feeder that helps ensure regular and well-controlled feeding for cats and small dogs, even when the owner is away from home. The device combines precise portion dispensing, a 1080p HD AI camera with night vision, two-way audio communication, and advanced analysis of feeding behavior. The system can recognize the faces of up to 15 pets and track separate statistics for each one, making it easier to notice changes in appetite and respond more quickly to your pet's needs. The large capacity provides a single pet with up to 15 days' worth of food, and the emergency battery backup maintains the feeding schedule for up to 14 days in the event of a power outage.

Smart feeding under full control

Regular meals are crucial for your pet's health and well-being. Using the PETKIT app, you can set exact feeding times, the number of meals, and portion sizes, tailoring the feeding plan to your pet's age, weight, and needs. When you want to reward your pet or give an extra portion, a single click is

all it takes to start remote feeding. The device also sends notifications about completed meals, low food levels, and any errors, so the owner always knows their pet has been fed on time.

An AI camera that records every meal

The built-in 1080p HD camera with a wide-angle view and night mode provides a live view at any time of day or night. You can check whether your pet actually approached the bowl, how long it ate, and how much food it consumed. The system automatically saves a history of visits and meals in a clear timeline, allowing you to conveniently analyze daily eating habits. This is a particularly useful feature for pet owners who want to closely monitor their pet's appetite and quickly notice any concerning changes. You can also easily turn off the camera if needed.

Face recognition and individual pet profiles

YumShare SOLO 2 uses artificial intelligence to recognize the faces of cats and dogs, allowing it to distinguish up to 15 pets and keep separate statistics for each one. In homes with multiple pets, this allows you to see exactly who eats regularly and who skips meals. Such detailed information helps you better care for your pets' health and quickly spot behavioral changes that may require more attention.

Portion control without overeating or waste

The right amount of food is crucial for maintaining your pet's healthy weight and overall well-being. The AI system monitors the food level in the bowl and can automatically pause dispensing once a set limit is reached. This ensures food doesn't sit out too long, stays fresh, and your pet gets exactly what it needs. It's an effective way to reduce overeating and food waste.

Stay connected with your pet even when you're away

Two-way audio lets you hear what's happening at the feeder and talk to your pet from anywhere. The familiar voice of the owner can calm the pet and encourage it to approach the bowl. You can also record your own voice message, which will play automatically at every feeding, creating a predictable and friendly routine for your pet.

Fresh food at every meal

The multi-stage Fresh-Lock system effectively limits moisture and air exposure, helping to preserve the food’s taste, aroma, and crispness. Anti-blockage technology ensures smooth dispensing and reduces the risk of the mechanism jamming. This ensures that every meal reaches the bowl at the right time and in the quality your pet expects. The Petkit YumShare SOLO 2 works with dry food up to approximately 12 mm in diameter and freeze-dried treats up to approximately 9 mm. This allows you to tailor feeding to your pet’s preferences and serve not only daily meals but also favorite treats.

Reliability even during power outages

The device operates on AC power but is also equipped with a backup battery that maintains the feeding schedule for up to 14 days. Importantly, programmed meals are stored locally, so the feeder continues to operate even if the Wi-Fi connection is lost. This provides added security and ensures your pet receives food as scheduled.

Compact design and safeguards against clever pets

Despite its large capacity, the feeder remains compact and doesn’t take up much space. The food supply lasts for one pet for up to 15 days, which works well both for daily use and during shorter trips. A special lock protects the container from being opened by curious and determined pets, ensuring the food stays securely sealed.

Manufacturer	Petkit
Model	Yumshare SOLO 2
Capacity	3 L (12 cups)
Number of scheduled meals per day	1 to 10 meals
Number of portions per meal	1 to 5 portions
App connectivity	Wi-Fi 2.4 & 5 GHz
