

Garrett ACE 150 metal detector

Model: 1138070

Manufacturer: GARRETT

EAN: 786156002708

Product Code: 1171249

R4,810

Garrett ACE 150 metal detector

The Garrett ACE 150 is an innovative model in the highly regarded ACE series that combines ease of use with advanced features to offer an effective and rewarding metal detection experience. The lightweight design and intuitive operation make the unit an excellent choice for beginners and professionals alike. The waterproof coil allows you to explore beaches and shallow bodies of water, giving you the freedom to operate in a variety of conditions. Get out into the field and find out how much history lies beneath the surface!

Intuitive operation and full control

The ACE 150 is equipped with simple buttons that allow you to start and configure the device instantly. One-click operation allows you to start searching almost immediately - without delving into complicated settings. The large LCD screen guarantees readable information, and the Target ID legend makes it easy to quickly identify a detected object.

Three search modes - greater precision

The detector offers three search modes to match the operation of the device to the type of metal being searched for. A notch function ensures that the absence of an audible signal will appear in areas where a particular type of metal has been missed, allowing you to focus only on interesting finds.

Adjustable sensitivity and detection depth

Four sensitivity levels allow the detector's operation to be fine-tuned to the terrain and size of the objects being searched for. High sensitivity will prove useful when locating small or deep objects, increasing the effectiveness of the search.

Exceptional reading accuracy

The coin depth indicator informs about the approximate distance of the object from the surface, allowing precise planning of the excavation. This feature allows you to get the most accurate reading possible, including for gold coins and jewelry.

Recognize metal by sound

Three levels of tone identification differentiate audio signals according to the conductivity of the metal (low, medium and high conductivity). This allows you to pre-determine the type of find just by the sound of the signal.

Ready for the field, even underwater

The waterproof 6.5" x 9" coaxial search coil provides greater accuracy and stable operation. The submersibility makes the ACE 150 ideal for exploration in shallow bodies of water and on wet beaches.

Comfort and safety of use

The Garrett ACE 150 is equipped with a charge status indicator, a low charge alert, and a ¼" headphone jack. This gives you full control over the device's runtime and allows you to enjoy —

uninterrupted adventures without unexpected interruptions. It's an ideal choice for anyone who wants to start their treasure hunting adventure or is looking for a reliable detector for everyday exploration

Included

- metal detector
- AA x4 batteries
- user manual

Manufacturer	Garrett
Model	ACE 150
Display	LCD screen
Number of search modes	3
Tone ID levels	3
Sensitivity levels	4
Adjustable sensitivity and depth	Supported
Coin depth indicator	Supported
Coil type	Concentric
Coil dimensions	6,5" x 9"
Coil water resistance	Yes
Charge status indicator	Supported
Low battery alert	Supported
Headphone jack	¼" (6.35 mm)

Gross weight: 1870, Box length: 55,50, Box width: 28,00, Box height: 13,00, Net weight: 1870,
