Darkflash TH285M computer case (black)

The Darkflash TH285M chassis is a sleek, compact design for gamers and PC gamers looking for the perfect balance of aesthetics, functionality and performance. Three glass panels provide full visibility of the interior, while compatibility with M-ATX and ITX motherboards and support for up to six fans and a 360mm radiator make it a great base for high-performance and stylish PC sets. It's an option for those looking for a case that stands out in both looks and capabilities.

Transparent design on three sides

The case is distinguished by as many as three transparent panels made of tempered glass, which allow you to easily view every detail of your setup. The transparent design not only enhances the aesthetics of your components, but also allows you to easily check the status of your components

and cooling efficiency. The thumb screw-mounted side panel facilitates quick access to the case's interior. From now on, your workspace will impress with its futuristic design.

Compatibility and space for components

The Darkflash TH285M supports M-ATX and ITX format motherboards, offering great flexibility when building a kit. The interior is designed to accommodate larger-sized components - the maximum height of the CPU cooler is 160 mm, and the length of a graphics card can reach up to 415 mm. Thanks to five PCI slots, the installation of even extensive graphics cards runs smoothly.

Advanced cooling capabilities

The TH285M is designed with optimal airflow in mind. It supports up to six 120 mm or two 140 mm fans, as well as 360 mm water cooling. This configuration keeps temperatures low even under intense system load, making this chassis ideal for gamers and developers who require stable operation of their components.

Convenient access to ports

On the front panel, you'll find a clear and organized layout of ports, including one USB 3.0 and two USB 2.0 connectors for quick access to transfer data and charge peripherals. This makes connecting accessories and external memory fast and convenient.

Ready for expansion

The well-thought-out, spacious interior layout makes it easy to install and later upgrade the kit. The case is equipped with the INF24T Black fan and is compatible with the D21 Black CPU cooling, providing a solid starting point for further system expansion. With easy cable management and plenty of space inside, assembling the computer is a breeze. It's the perfect choice for any gamer, graphic designer, or computer enthusiast.
