Find the latest prices on Currys PC World Find the latest prices on Argos The smart, compact design of the QL-600B address label printer allows it to sit neatly on your desk, connected to your PC or Mac's USB interface. Using P-touch Editor label design software (available as a free download) you can add text, images, barcodes, frames and other items onto your labels before printing. Use the integrated cutter together with one of the continuous DK label rolls to create labels up to one metre in length - ideal for signs and banners. Or add to this a large range of various pre-sized die-cut label rolls, and you have the ideal postage or shipping label printer that can do so much more.
