## R20,917

Accelerate your digital transformation with a seamless as-a-service compute lifecycle management experience from edge-to-cloud.

Every business is facing tough challenges - to digitally transform, address security risks, and operate efficiently. Complex server management is a distraction from these challenges, consuming IT resources and slowing innovation. HPE GreenLake for Compute Ops Management solves these challenges by simplifying and unifying operations across the server lifecycle, no matter where your compute infrastructure lives. The service provides a consistent, secure cloud experience for the whole environment that scales elastically and unifies compute management.
