EAN: 5901969413250

Product Code: 1184233

R508

Lanberg's great quality audio cable allows the transmission of stereo sound, using a 3.5mm mini-jack connector. Product is ideally suited for vast majority of audio devices such as PCs, smartphones, notebooks, laptops, towers, televisions, media players, projectors, and other various types of peripheral and household equipment. The possibilities of cable connection are limited only by the socket placement and the length of the cable - the rest does not matter.
