R536

Lanberg's high-quality USB 2.0 Mini-B cable, is designed to allow the connection e.g. between the desktop PCs / Laptops and the digital cameras or MP3 players. Furthermore, it can also be used to plug any other devices, with a USB 2.0 Mini-B Input, e.g. Canon products; or any device with USB 2.0 input.

Having high standards and restrictions, in the production stage and multi-step quality controls, allows the final product to meet the high standards and norms, associated with this type of cable. As a result of those, complex product evaluations, the expectations of even most demanding users can be fulfilled.

All in all, every single Lanberg USB cable, provides its users with a stable, fast and uninterrupted signal, which translates into appropriately high transfer.
