

GIGABYTE X870 A STEALTH AM5 1xHDMI

Model: X870 A STEALTH

Manufacturer: GIGABYTE

Product Code: 1185970

R8,519

The GIGABYTE AORUS X870 STEALTH motherboard is designed to elevate the performance and efficiency of any gaming or high-performance computing setup. This ATX motherboard features support for AMD Ryzen processors, ensuring compatibility with the Ryzen 7000, 8000, and 9000 series. Equipped with a robust AMD X870 chipset, it offers expansion possibilities, allowing you to utilize multiple PCIe slots and M.2 connections for a customizable and powerful experience. High-definition audio capabilities and a range of connectivity options, including USB 4 and 5 Gigabit Ethernet, enhance the overall functionality for gaming and multimedia operations.

The AORUS X870 STEALTH motherboard features support for DDR5 memory with speeds reaching up to 8000 MT/s overclocked, making it suitable for advanced memory configurations. Its 16+2+2 phase power design, coupled with thermal armor and advanced cooling solutions, ensures stability and efficiency under heavy loads. The RGB FUSION lighting system provides customizable aesthetics, while features like the EZ Debug LED and MultiKey simplify troubleshooting and enhance usability. This motherboard is a solid foundation for builders looking to maximize performance and deliver quality results for demanding applications.
