

GIGABYTE B840M H AM5 2xDDR5 4xSATA 1xM.2 1xHDMI 1xDP

Model: B840M H

Manufacturer: GIGABYTE

Product Code: 1185971

R2,803

The GIGABYTE B840M H motherboard is designed to offer robust performance with its micro ATX form factor and compatibility with Ryzen processors from the 7000 to 9000 Series. It supports DDR5 SDRAM memory technology, allowing for speeds of up to 7200 MT/s when overclocked, ensuring that users can enjoy enhanced multitasking and gaming. The motherboard features dual-channel memory architecture and a variety of storage options, including four SATA-600 ports and one M.2 socket, making it suitable for building a powerful and efficient system.

In addition to its specifications, the GIGABYTE B840M H motherboard comes equipped with features for durability and ease of use. It includes hardware monitoring capabilities to track system temperatures and fan speeds, enhancing the longevity of components. The RGB FUSION feature allows for customizable lighting styles, while the DIY-friendly design simplifies the building process, making it accessible for enthusiasts and newcomers. With high definition audio output and multiple USB ports, this motherboard ensures a rich audio and connectivity experience.
