Model: 941-000123

Manufacturer: LOGITECH

EAN: 5099206058996

Product Code: 1215941

R7,809

Feel your tires on every turn and type of terrain, sense under- or over-steer drifting. Powerful dual-motor force feedback realistically simulates force effects for precision response.

Driving Force handles the stress of racing action and is built for long-lasting reliability. Solid steel ball bearings in the wheel shaft and stainless steel paddle shifters and pedals make G920 the long-distance race wheel. It's covered in high-quality, hand-stitched leather, with the look and feel of a high-performance racecar wheel and it gives you a more comfortable, durable experience.

Helical gears are modeled after gears used in automotive transmissions to reduce unwanted noise and vibration. Anti-backlash keeps the wheel and pedals tight, maximizing your control. This steering wheel delivers exceptionally smooth, quiet steering action. G920 Driving Force racing wheel features a long lasting, reliable hall-effect steering sensor, using magnetic fields to sense the position of the wheel.
