

VEHICLE RECORDER DRIVEPRO 620/2X32GB TS- DP620A-32G TRANSCEND

Model: TS-DP620A-32G

Manufacturer: TRANSCEND

EAN: 760557851257

Product Code: 1216428

R5,627

The DrivePro 620 is the ultimate pair of dashcams combining Transcend's DrivePro 250 as the front camera and DrivePro 10 as the rear camera. Featuring high-sensitivity STARVIS™ image sensors, it delivers crystal clear sharpness and night images even in low light. 1080P Full HD recording at 60fps ensures smooth image capture and clear critical shots. With built-in safety functions like a head-up display, emergency recording, and more, the DrivePro 620 is bound to protect your journey all round.

STARVIS™ high-sensitivity image sensors

The DrivePro 620 is the ultimate in dashcam technology, pairing Transcend's DrivePro 250 as a front camera and DrivePro 10 as a rear camera. Both feature STARVIS™ image sensors to capture high-

resolution images in superb, rich color even in low light. Supporting 1080P Full HD recording at 60fps, the DrivePro 620 offers smooth footage as well as crisp still images.

Dual camera recording, double the safety.

Packed with compact front and rear cameras, the DrivePro 620 monitors both the road ahead and behind simultaneously in ultra-high resolution, which means extra security for your journey. The 140° wide-angle view makes sure no details are missed. Plenty of smart functions make every journey safer.

Wi-Fi connectivity

The DrivePro 620 features Wi-Fi connectivity to connect it to the exclusive DrivePro App for real-time footage playback and download. When Wi-Fi is activated in the front camera, the rear camera will be automatically connected to Wi-Fi as well. This means ease of access to video evidence for reporting incidents to law enforcement and insurance companies without having to remove the memory card.

GPS/GLONASS receiver

The front camera, DrivePro 250, features a GPS/GLONASS receiver, which can log coordinates, date, and time with recorded video footage. Driving data will be automatically synchronized to footage recorded by the rear camera. The coordinates precisely locate where an incident happened so that emergency road services, police, or an insurance representative can respond more quickly.

Built-in battery

In the event of a power outage, the built-in Li-Polymer battery can temporarily supply power to the DrivePro dashcam until the files being recorded are safely stored, so to prevent losing crucial images due to file damage.

Head-up display

Shows current speed and driver safety alerts, including LDWS, FCWS, headlight reminder, and driver fatigue alert.

Smart adaptive display

Responds to the lighting in your surroundings and adjusts accordingly.

Parking mode

Activates recording when motion is detected, even when you're away from your vehicle.

Lane Departure Warning System

Prevents accidents by issuing a warning when the vehicle veers out of a lane.

Forward Collision Warning System

Warns the driver when the vehicle is getting too close to the car ahead.

Speed alarm

Issues an onscreen alert with a warning sound whenever the vehicle's speed exceeds a preset value.

Emergency recording

Prevents overwriting of the file being recorded at the time when the G-sensor detects an impact.

Time-lapse recording

Takes you right to the heart of the matter without needing to view hours of incident-free video.

Headlight reminder

Automatically activates when the DrivePro detects poor lighting conditions.

Driver fatigue alert

Regularly reminds the driver to rest after driving for a self-defined period of time.

Wide Dynamic Range

Balances the light and dark areas of captured images, ensuring that every critical shot is as clear as possible.

Handy snapshot button

Allows you to take photos while recording a video. When you press the snapshot button on the front camera, the rear camera will also take a snapshot. You can also remove the DrivePro from the vehicle to create a photographic record of collision damage.

Format-free technology

Utilizes the latest format-free technology to reduce memory card errors, obviating the need for frequent formatting.

Dual USB Car Lighter Adapter

The DrivePro 620 also comes with a dual USB car lighter adapter, which includes one car charger with dual USB ports and 8m and 4m cables. You can power your front and rear dashcams at the same time!

Value-added software

Transcend offers free software, DrivePro Toolbox. It features video sorting function, smooth video playback, video editing, screenshot, and map view. Users can synchronize the front and rear footage to carry out these operations. It creates a more convenient experience for DrivePro users!

Transcend's DrivePro App is designed specifically for use with DrivePro dashcam models featuring Wi-Fi connectivity. It allows streaming and downloading of recorded files to mobile devices quickly and conveniently.
