OneOdio A70 Gen 2 Headphones

The black OneOdio A70 Gen 2 are over-ear headphones designed for both everyday music listening and DJ monitoring. They feature 40-millimeter drivers, support the LDAC codec as well as Hi-Res Audio and Hi-Res Audio Wireless standards, and have a frequency response of 20 Hz-40 kHz. Bluetooth 6.0, the ability to connect to two devices, up to 72 hours of wireless battery life, support for 3.5 mm and 6.35 mm cables, and ear cups that rotate 90° allow you to use them with both mobile devices, computers, and DJ equipment. The foldable design also makes it easy to store and transport the headphones.

40-millimeter drivers and a wide frequency response

The 40-millimeter drivers operate in a frequency range from 20 Hz to 40 kHz, allowing for the reproduction of both low frequencies and more detailed high frequencies. The headphones support LDAC, AAC, and SBC codecs, allowing them to work with a variety of audio sources. Hi-Res Audio and

Hi-Res Audio Wireless certifications confirm that this model is capable of playing high-resolution audio via both a wired connection and a compatible wireless connection.

Bluetooth 6.0 and Dual-Device Connectivity

The OneOdio A70 Gen 2 uses Bluetooth 6.0, allowing you to listen to music wirelessly without the need for an audio cable. The transmission range is at least 10 meters, so you can move more freely near the connected device while using the headphones. The Dual-Device Connection feature allows you to connect to two compatible devices simultaneously, which can make it easier to use, for example, your phone and computer without having to re-pair them frequently.

Up to 72 hours of battery life and USB-C charging

The built-in 650 mAh battery provides up to 72 hours of wireless playback on a single charge. This long battery life reduces the need to reach for a charger frequently while working, traveling, or listening to music daily. Charging is done via the USB-C port, and a full charge takes about 2 hours.

Wired Mode for Audio and DJ Equipment

The headphones can operate both wirelessly and when connected via a cable, so you can tailor their use to your specific equipment. The 3.5 mm and 6.35 mm jacks let you use them with computers, mobile devices, mixers, and DJ controllers, among other things. The set includes a 3-meter 3.5 mm–6.35 mm audio cable, which provides greater freedom of movement while working at your setup.

Rotatable ear cups and foldable design

The ear cups can be rotated 90°, allowing for more comfortable one-ear listening while monitoring a mix. This is particularly useful in DJ applications, where there is often a need to simultaneously listen to the audio through the headphones and ambient sound. When not in use, the headphones can be folded and stored in the included carrying case, taking up less space during transport.
