the connected computer.

Easy switching between computers

Switching between two connected computers is easy with the dedicated button on the AC7912 KVM switch. Prefer to use IR control, a mouse, keyboard shortcuts or RS-232 commands? This is also supported.

Auto input switching

Have two computers connected to the KVM switch and only one is active? The AC7912 will automatically detect the active device.

Additional features

The AC7912 includes four USB 3.2 Gen1 (USB 3.0) 5Gbps ports for sharing peripherals, such as a keyboard, mouse, printer and more. The switch also has a 3.5mm audio jack for connecting headphones or speakers. HDMI cables, USB cables, remote control, RS-232 connector and mounting brackets are included.

Prevent accidental power cord disconnection

The power connection on the KVM switch is secured with a screw lock to prevent accidental disconnection.

User scenarios

Business use:

- Government offices: Control sensitive systems that are isolated from the network.
- Datacenters and server rooms: Troubleshoot, update and maintain servers.

Home use:

- Home office: switch easily between your personal computer and work laptop and use only one monitor, mouse, keyboard setup.
