Moderna line is distinguished not only by the design and the elegance of its line but also by the functionality of the products in the range. The kettle has a 360° cordless base which enables you to take it straight to the table or place it wherever you wish on the kitchen work surface. The stainless steel body gives it solidity and boasts a visible thermometer which indicates the water temperature and a removable and washable filter. Plus, thanks to the automatic shut-off feature, while it boils you can allow yourself a moment to relax in complete safety and with a touch of true style.
