

Pet Feeder Rojeco Smart Pet Feeder Video Version 1080P

Model: RWSQLMSP-DP

Manufacturer: ROJECO

EAN: 6975116295913

Product Code: 1221900

R1,897

Rojeco Smart Pet Feeder with 1080p Camera

The Rojeco Smart Pet Feeder with 1080p camera not only automatically dispenses food but also lets you keep an eye on your pet from a distance. The Full HD camera with a 2-megapixel sensor and a 120° wide-angle lens provides a real-time view, while two-way voice communication makes it easy to interact with your pet. From the app, you can create custom feeding schedules, dispense food remotely, and review meal history. The 4-liter hopper holds enough food to last for about a month, and the anti-jamming mechanism handles kibble with a diameter of 3 to 13 mm.

1080P Camera and Interaction with Your Pet

The built-in 1080P camera offers 2-megapixel resolution and a wide 120° field of view, so you can keep an eye on what your pet is doing at all times. The full-screen preview makes it easy to watch your pet and also lets you quickly check how much food is left in the bowl. The feeder supports two-way voice communication and also allows you to record a message up to 10 seconds long, which can be played during mealtime.

Remote feeding and control via the app

2.4 GHz and 5 GHz Wi-Fi connectivity lets you use the smart features even when you're away from home. In the app, you can set up a personalized feeding schedule, view daily meal history, and start feeding remotely. Notifications are also available for low battery, when food needs to be refilled, and in case of malfunctions. When the device is running on battery power only, the app's remote control features are not available.

Food Jam Prevention System

The feeder automatically detects food jams and, if necessary, activates a reverse mechanism to help restore proper dispensing. The four-stage design features soft rubber components that move the food, a properly sized outlet, a rubber baffle, and a mechanism that controls the amount of food dispensed. The device can dispense dry, air-dried, freeze-dried, and mixed food.

Triple Freshness Protection

The triple protection system helps limit air and moisture exposure to stored food. A thicker, self-locking lid seals the container; a separate dehumidifying chamber helps protect the contents from moisture and pests; and the hidden dispenser opening closes after a portion is dispensed. This design helps maintain optimal pet food storage conditions for longer.

Two Power Options and Easy Cleaning

The dual power system allows you to use either AC power or D-cell batteries, which must be purchased separately. When running on batteries, the operating time can be up to 180 days, and the backup power source allows the feeder to continue dispensing food even during a power outage or power grid issues. The food hopper, bowl, and dispensing mechanism can be removed and washed,
