Puluz Waterproof Case (45m) for USB-C Smartphones for Underwater Photography and Videography (White)

The PULUZ PU9100W waterproof case is a practical accessory designed for underwater photography and videography with a smartphone, allowing you to safely submerge your device to a depth of up to 45 meters. The sealed, fully enclosed design effectively protects your phone from water, dust, dirt, scratches, and mechanical damage, making it perfect for diving, snorkeling, surfing, boating, and other outdoor activities.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Convenient controls and sturdy construction

The case is made of durable, corrosion-resistant polycarbonate (PC), which ensures longevity even in demanding conditions. The transparent design guarantees a clear view underwater, and the physical directional buttons and OK button allow for convenient control of camera functions without having to directly touch the screen. The housing also supports touch control underwater (under standard conditions up to approximately 30 m). The maximum recommended operating temperature is 40°C.

Wide compatibility with iPhone and Android

The PU9100W is compatible with select iPhone models (15 / 15 Pro / 16 / 16 Pro / 17 / 17 Pro / 17 Air) and Android smartphones with a USB-C port and OTG functionality, including devices from Samsung Galaxy, Huawei, Xiaomi, and Google Pixel. It is a versatile solution for users who want to capture photos and videos underwater without sacrificing their smartphone’s functionality.
