

Puluz waterproof diving case for Insta360 X4 Air (up to 50m)

Model: PU1064T

Manufacturer: PULUZ

EAN: 5905156101760

Product Code: 1231828

R2,236

Puluz waterproof dive housing for Insta360 X4 Air (up to 50m)

The Puluz Waterproof Dive Case for Insta360 X4 Air is a professional protection designed to record spectacular underwater shots without compromising on image quality. Precision-fit design, full waterproofing to up to 50 meters and an invisible in-frame spherical optical system allow you to capture smooth 360° panoramas even in demanding conditions. High-quality materials, impact, scratch and vapor resistance, and solid steel components make the Puluz housing a reliable solution for those who want to safely use their Insta360 X4 Air camera during water sports, while maintaining full creative freedom and professional results.

Crystal clear images, even underwater

The high-quality PMMA lens used is distinguished by very high light transmission, which reaches up to 98% after anti-reflective coatings. Additional layers that protect against evaporation, water droplets and fingerprints allow you to maintain maximum image clarity, and the hardened surface with a hardness of 5H effectively protects the lens from scratches, comparable to classic glass.

Full protection without compromise

The case made of hardened PC plastic, reinforced both on the inside and outside, effectively protects the camera from impacts, dust and mechanical damage. Precise form-fitting to the camera's shape makes the whole thing a cohesive, secure design, ready for demanding conditions under water up to 50 meters deep. The matte, fingerprint-resistant texture makes the whole thing look professional and maintains an aesthetically pleasing appearance even under heavy use.

Invisible design for 360° shots

The unique spherical optical design is designed to remain completely "invisible" in the frame. This allows you to capture full 360° panoramic shots without worrying about blind spots or image noise. The housing allows for natural, seamless blending of frames underwater, preserving the immersive video effect that Insta360 cameras are known for.

Ready for professional underwater challenges

A sealing ring made of high-activity amorphous silicone, supported by liquid silicone technology, is responsible for the seal, which significantly increases the level of protection against water. Structural components such as the hinge connecting the body to the back flap and the buttons are made of 316 stainless steel, ensuring high durability and corrosion resistance. An additional anti-fog insert effectively reduces evaporation inside the housing, ensuring a dry and clear image throughout recording.

Included

- waterproof housing
- long screw
- adapter
