Magcubic HY350MAX Projector

The Magcubic HY350MAX is a versatile projector that combines native 1080p resolution, brightness of up to 600 ANSI lumens, and support for 8K signals, delivering a crisp and detailed image. It runs on Android 14 and utilizes a powerful Allwinner H726 processor, ensuring smooth performance for apps and multimedia. Furthermore, auto-focus and keystone correction, Wi-Fi 6, Bluetooth 5.4, and a built-in 15W speaker make this device a complete home entertainment solution.

Full HD image with 8K support - details that make a difference

The projector displays images at a native resolution of 1080p, ensuring good sharpness and detail clarity when watching movies, TV shows, or sports broadcasts. At the same time, 8K signal support allows you to use modern video sources without losing quality, and a 60 Hz refresh rate guarantees exceptional smoothness—even during dynamic scenes. With 600 ANSI lumens of brightness and HDR support, the image remains clearly visible, and colors are vivid and saturated. This makes the

projector ideal for use both in the evening and during the day! Add to that a high contrast ratio of 2000:1, up to 1.07 billion colors with 10-bit depth, and accurate color reproduction. All of this translates to fantastic image quality.

Android 14 - access to thousands of apps

The HY350MAX runs on Android 14, which enables smooth and intuitive use of smart features without the need to connect additional devices. This gives you access to over 6,000 apps and lets you watch content from popular streaming platforms directly from the projector. The interface is clear and easy to use, and precise controls let you quickly navigate through menus and apps.

Powerful Allwinner H726 processor

The projector is powered by the Allwinner H726 processor with a quad-core ARM Cortex-A53 architecture and Mali-G31 graphics, ensuring smooth performance and efficient multimedia handling. Combined with 2 GB of RAM and 16 GB of ROM, this allows you to comfortably use streaming apps and store essential data without worrying about performance drops.

Auto Image Adjustment - Quick and Effortless Setup

The projector is equipped with a set of features that simplify its operation. Auto Focus ensures quick focusing, while automatic keystone correction maintains proper image proportions even when the device isn't positioned perfectly straight. Additionally, the image adjustment option, obstacle avoidance, and 80-100% zoom range allow you to easily adapt the projection size to the space. This solution means that getting started takes only a moment and requires no complicated manual configuration.

A large screen in a small space - 1:1 throw ratio

Thanks to its 1:1 throw ratio, the HY350MAX model allows you to achieve a large image even from a short distance. At a distance of about 1.5 m, you can achieve a screen size of approximately 70 inches, and at greater distances, up to 140 inches. This is a huge advantage in apartments and smaller rooms where it's not possible to place the projector far from the wall.

Built-in 15 W speaker - great sound quality

The projector is equipped with a 15 W speaker that delivers clear and sufficiently loud sound for everyday use. This allows you to watch movies or TV shows without having to connect additional audio equipment. This is a particularly convenient solution if you plan to use the device in different locations—for example, in the living room and bedroom.

Stable connection - Wi-Fi 6, Bluetooth 5.4, and HDMI

The projector supports modern wireless connectivity standards, such as Wi-Fi 6 (2.4 GHz + 5 GHz) and Bluetooth 5.4, which ensures fast and stable data transfer. This allows you to easily stream movies, use online apps, or cast content from your smartphone. Bluetooth also allows for easy connection of headphones or external speakers, enhancing the user experience. Additionally, the projector supports low-latency wired connections via HDMI.

Quieter and more efficient operation

The Magcubic HY350MAX projector has been optimized for user comfort and energy efficiency. It offers low noise and power consumption, which translates to a more peaceful viewing experience without distracting noise. This makes it perfect for evening or nighttime screenings when peace and comfort matter most.

Flexible setup - watch however you want

The HY350MAX offers great flexibility—you can easily adapt it to various spaces and usage scenarios. The projector allows for tilt adjustment up to 180°, enabling you to project the image onto both walls and ceilings—a great solution, for example, for watching movies in bed. Side projection support provides additional setup flexibility, and the compact dimensions (approximately 18.3 × 22.1 × 10.9 cm) and weight of about 1.4 kg make the device easy to carry and use exactly where it's needed—in the living room, bedroom, or even outdoors.
