Magcubic HY300PRO+ Projector

The Magcubic HY300PRO+ in gray is a compact, portable projector with a native resolution of 720p (1280 × 720), 4K content support, and a brightness of 200 ANSI lumens, allowing it to display an image up to 130 inches in diagonal. Thanks to the Allwinner H726 processor and the latest Android 14 operating system, it runs smoothly and provides convenient access to entertainment without the need to connect additional devices. Wi-Fi 6 and Bluetooth 5.4 connectivity, a built-in 5 W speaker in the base (Speaker Base), and a 180° swivel design make the device ideal for both home use and outdoor viewing.

Large Image and Flexible Projection Adjustment

The projector can display images ranging from 80 to as large as 130 inches, allowing you to adapt it to various spaces and needs. The recommended distance of 1.6 m produces an 80-inch screen. At a distance of 2.0 m, you'll get a 100-inch screen, and at 2.6 m, you'll reach the maximum size of 130

inches, making it easy to host a movie night in your living room or outdoors. The digital zoom range of 80–100% allows you to precisely adjust the image size without having to change the device's settings, which significantly increases convenience in smaller rooms.

Precise image adjustment with minimal effort

The HY300PRO+ model offers a dual focusing system: manual adjustment via a dial and a digital focus mode (Digital Focus), allowing you to instantly achieve a crystal-clear image. Auto Vertical Keystone automatically straightens the image when it's projected onto a wall at an angle, while manual horizontal correction gives you full control over the projection geometry. Thanks to these features, you can set up the projector almost anywhere and enjoy a perfectly proportioned image without time-consuming adjustments.

Smart TV Always at Your Fingertips

Thanks to the latest Android 14 system and the powerful Allwinner H726 processor, the projector functions as a standalone entertainment center. This allows you to directly access apps such as YouTube, Netflix, Disney+, Prime Video, and Hulu without having to connect external devices. The Wireless Casting feature allows for instant, wireless screen mirroring from iOS, Android, and Windows devices, making it a versatile tool for both home movie nights and professional presentations.

Fast Connectivity and Broad Compatibility

Support for the modern Wi-Fi 6 standard (dual-band 2.4G/5G) ensures a stable and fast connection, guaranteeing smooth playback of high-quality videos without buffering. Bluetooth 5.4 enables instant and energy-efficient pairing with headphones, external audio systems, or control accessories. The projector offers broad compatibility thanks to its HDMI and USB ports, as well as a 3.5 mm audio output, allowing you to easily connect a laptop, game console, TV Stick, or USB flash drive and use multiple content sources simultaneously.

Built-in Audio for Everyday Use

The projector is equipped with a 5 W speaker integrated into the base using Speaker Base technology, allowing you to enjoy clear sound without having to connect an additional sound system. This is a practical solution for screenings, presentations, or watching movies outdoors. Thanks to the Bluetooth 5.4 module, you can also instantly connect the projector to external headphones or a more powerful audio system for an even more immersive cinematic experience.

Compact and ready to take anywhere

The projector stands out with its exceptionally compact design, measuring 177 mm in height and 94.8 mm at the base. It weighs only about 400 g, which means it fits easily into a bag or backpack. The integrated handle on the base makes it easy to carry, and its lightweight design makes it an excellent and practical solution for mobile use.

180° Rotating Design - Complete Freedom of Placement

The 180° rotation feature allows you to freely project the image onto a wall, ceiling, or any other surface without the need for tripods or additional mounts. This is a practical solution, especially during evening screenings, when you can comfortably watch a movie while lying down, directing the image directly above you. The integrated stand with a handle makes it even easier to set up the projector stably anywhere and instantly adjust the projection angle to suit your needs.

Included:

- Projector
- Remote control
- Power cable
- User manual

Manufacturer	Magcubic
Model	HY300PRO+
Max. native resolution	720P (1280 × 720p)
