The Green Cell Microsine 2000VA LCD is an efficient uninterruptible power supply designed to ensure that electronic devices remain protected during power outages and fluctuations. This UPS provides a sinewave output waveform, offering a stable power supply that is crucial for sensitive equipment.

With a power capacity of 2000 VA and a power output of 1400 watts, it is suited for various applications requiring reliable and continuous power. Equipped with an LCD display, users can easily monitor the power status and performance metrics, enhancing operational efficiency. The built-in Automatic Voltage Regulation (AVR) ensures a consistent voltage level, protecting devices from voltage spikes and drops. Its line interactive UPS technology, along with the capability to manage connections via USB, makes this system a versatile choice for home and business environments.
