SJCAM C300 Action Camera (black)

The SJCAM C300 lets you capture dynamic 4K footage during activities where using a smartphone would be inconvenient or impractical—whether you're biking, riding a motorcycle, on the slopes, or underwater. The camera records at a maximum resolution of 3840 × 2160 px at 30 fps and takes photos up to 20 MP, while its wide 154° field of view lets you capture expansive scenery and the flow of the action. It also features 6-axis gyroscopic stabilization, 8x digital zoom, and water resistance up to 30 m when the camera is placed in a suitable housing. Its long battery life—up to 460 minutes when recording in 4K at 30 fps—means the C300 can accompany you even on multi-hour adventures.

4K, 20 MP, and a wide field of view

The high-quality footage lets you revisit the most exciting moments and see details that are easy to miss while riding at high speeds or engaging in other activities. The SJCAM C300 offers 4K recording at 3840 × 2160 at 30 fps, 2K (2560 × 1440) at 60 or 30 fps, and Full HD (1920 × 1080) at up to 120

fps, while photos can have a resolution of up to 20 MP. The f/2.0 lens provides a 154° field of view, allowing you to capture a large portion of your surroundings in a single frame—which is particularly important when recording landscapes and dynamic activities. The camera also features distortion correction and an 8x digital zoom.

Stable footage and impressive slow motion

A bumpy trail, a fast descent, or handheld recording all mean constant camera movement, which is why the SJCAM C300 uses 6-axis gyroscopic stabilization. This helps reduce shake during dynamic activities and produces smoother footage that's more enjoyable to watch when you return from your trip. The C300 also lets you capture fast-paced action with dramatic slow-motion effects—it offers 2x slow-motion in 2K at 60 fps, 4x in 1080p at 120 fps, and 8x in 720p at 120 fps. So you can capture a jump, a splash of water, or any other moment that lasts only a split second in reality with greater detail.

Ready for Water and Active Adventures

The SJCAM C300 can accompany you even when conditions aren't suitable for using a regular camera or smartphone. When placed in a waterproof case, it allows you to record at depths of up to 30 m, and a special underwater white balance mode helps adjust the image to these conditions. Settings such as Auto, Daylight, Cloudy, Tungsten, and Fluorescent, as well as exposure compensation ranging from +2 EV to -2 EV. Despite its wide range of features, the camera measures 130 × 32 × 25.5 mm and weighs 132 g, making it easy to take along on your adventures. Compatibility with a waterproof case, bike mount, handlebar mount, and helmet mount allows you to tailor the mounting method to the type of activity and capture events from your chosen perspective.

Two Screens, Wi-Fi, and Remote Control

The SJCAM C300 is equipped with two 1.3-inch touchscreens that make it easy to monitor the preview and operate the camera from different angles. This feature is useful both when recording events in front of the lens and when you appear in the footage yourself, allowing you to frame shots more comfortably and monitor the footage in real time. Wi-Fi connectivity provides additional control options—the camera supports the 2.4 GHz band in the 802.11b/g/n standards and the 5 GHz band in the 802.11a/n/ac standards, and the app makes working with your recordings more convenient. The

device also supports live streaming on YouTube, works with the dedicated SJCAM remote control, and can function as a webcam, meaning its uses aren't limited solely to sports and travel.

More Modes and Up to 460 Minutes of Battery Life

The C300 offers a range of modes that allow you to tailor your recording to specific scenarios. The camera supports time-lapse, slow motion, car mode, loop recording, pre-recording and delayed recording, motion detection, portrait mode, and simultaneous photo and video capture. Loop recording can be set to 3-, 5-, or 10-minute intervals, and photo modes include standard photos, interval shots, burst mode, and time-lapse photography. The 1000 + 2800 mAh battery system provides up to 460 minutes of runtime when recording in 4K at 30 fps with the mount and an extra battery. The camera records footage to microSD cards with capacities up to 128 GB and features a USB-C port. Audio is captured by a single built-in microphone; a single speaker allows for audio playback. Videos are saved in MP4 format with H.264 encoding, and photos in JPG.

Included in the set

- Camera
- Waterproof case
- Frame mount
- Rear rail
- Mounting bracket
- Quick-release mount with mounting screw
- USB charging cable
- Lanyard
- 3M mounting stickers
- 2x flat/curved mounting bases
- Cleaning cloth
