

POWERWALKER 1GBPS SNMP MODULE FOR UPS SERIES VFI 1000-3000 TGB/TGS/TGS

Model: 10131029

Manufacturer: POWER WALKER

Product Code: 1243485

R4,610

The BlueWalker PowerWalker Mini NMC Card NG is an efficient remote management adapter designed for seamless integration into network systems. This plug-in module features wired connectivity technology that supports multiple Ethernet types, ensuring high-performance data transfer rates of up to 1000 Mbps. With a robust HTML5 User Interface, users can easily manage and monitor their network settings, while the fanless design contributes to quiet operation in any environment.

With an operating temperature range of 0°C to 40°C and a humidity tolerance of 5 to 95% (non-condensing), this adapter is built to perform reliably in various conditions. Equipped with multiple remote management protocols such as SNMP, Modbus TCP, and SSH, it facilitates easy communication and management. Additional features include email alert notifications and a log viewer for comprehensive monitoring, making it a suitable choice for those seeking a reliable solution for network management.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
