Product Code: 1250755

R2,522

ANMITE A160W03 16" Portable Monitor

The ANMITE A160W03 portable monitor, featuring a 16-inch IPS screen with a resolution of 1920 × 1200, provides a large workspace and a clear image for work, entertainment, and gaming. A 60 Hz refresh rate, 280 cd/m² brightness, and wide 178° viewing angles ensure that the displayed content remains clear from various perspectives. The slim design, just 1.3 cm thick, the light weight of 0.81 kg, and the built-in fold-out stand make it easy to use the monitor virtually anywhere, while the narrow bezels further enhance viewing comfort.

Comfortable work and entertainment on a larger screen

The ANMITE A160W03 works well as a secondary screen for a laptop, desktop computer, mini PC, smartphone, or many other devices. Expanding your workspace makes it easier to multitask, and the

larger screen provides a more comfortable experience for design work, watching movies, and gaming. The monitor delivers a seamless extended display without lag, making it ideal for both daily tasks and entertainment.

Wide compatibility with many devices

The monitor works with laptops, desktop computers, mini PCs, smartphones equipped with a USB-C port, and PS3, PS4, PS5, Xbox One, Xbox, and Nintendo Switch consoles. It can also be connected to a camera, Raspberry Pi, TV box, microscope, or CCTV systems. Thanks to this broad compatibility, a single monitor can serve many different functions at home, in the office, or while traveling.

Easy Communication and Convenient Connectivity

The A160W03 model is equipped with two USB-C ports—one for power and the other for video transmission—as well as a Mini HDMI port for connecting devices that use the HDMI interface. Smartphones with a USB-C port can display content on a larger screen and support Huawei EMUI PC and Samsung DeX modes, enabling a computer-like working environment. The monitor also supports connecting an external keyboard and mouse, as well as reverse charging for your phone. For the Nintendo Switch console, a direct USB-C connection is possible without using a dock, with support for TV mode and reverse charging of the console.

Portable Design and Practical Features

The ABS plastic housing is lightweight and has a slim profile, making it easy to move the monitor between home, the office, and the workplace. The integrated fold-out stand allows you to quickly adjust the screen to a comfortable angle, and the carbon-fiber-textured finish on the rear panel gives the design a modern look. The monitor also features a 7.5 cm VESA mounting hole pattern, a 3.5 mm headphone jack, a power button, and a control wheel for convenient adjustment of settings.

Clear Image and Built-in Stereo Speakers

The LED-backlit IPS panel offers a resolution of 1920 × 1200, wide 178° viewing angles, and a clear image for everyday use. The built-in dual stereo speakers offer balanced sound and clear audio, allowing you to comfortably watch movies, give presentations, or enjoy multimedia without having to
