

AOCHUAN V3 Gimbal with AI Sensor (Black)

Model: 1010100335

Manufacturer: AOCHUAN

EAN: 6972467711567

Product Code: 1250774

R2,565

AOCHUAN V3 Gimbal

The AOCHUAN V3 is an advanced 3-axis smartphone gimbal with an intelligent AI sensor that offers image stabilization, 360° automatic face tracking without an app, and gesture control. The gimbal supports 6 recording modes, operates for up to 7.5 hours on a single charge, and is compatible with smartphones ranging from 55 to 85 mm in width and up to 10.5 mm in thickness. The maximum load capacity of 330 g allows for use with most modern phones, including larger models equipped with advanced cameras. The foldable design makes it easy to transport, so the AOCHUAN V3 is perfect for both home recording and travel.

Professional image stabilization in any situation

The 3-axis stabilization system effectively reduces vibrations and shocks that occur while walking, running, or recording handheld. This makes videos smoother, and the finished footage looks more professional and is more enjoyable to watch. With a maximum load capacity of 330 g, the gimbal

works seamlessly with most modern smartphones. It's a practical solution for those creating vlogs, travel vlogs, short videos, and social media content.

Intelligent 360° face tracking without an app

The magnetic AI module automatically detects and tracks the face across a full 360° range, keeping the user centered in the frame. The feature works without the need to install additional apps, allowing you to start recording faster and keeping setup to a minimum. Gesture control lets you start or stop tracking with a simple hand motion. The built-in fill light improves facial visibility in low light, resulting in clearer recordings.

Six operating modes and a wide range of motion

The AOCHUAN V3 offers 6 recording modes: PF, F, POV, DM, GO, and S. These allow you to adjust the stabilization to suit calm panoramas, dynamic sports shots, and creative first-person perspective recordings. The Pan axis allows for a full 360° horizontal rotation, enabling unlimited subject tracking.

Built-in tripod and telescopic arm up to 1.8 meters

The integrated tripod can be unfolded with a single button, allowing you to quickly set up the gimbal on a desk or the floor. The built-in telescopic arm extends up to 130 cm, and the total height of the setup, including the smartphone, can reach up to 180 cm. This is particularly useful when recording tutorials, hosting live streams, and taking group photos. The extended reach allows you to frame your shots more comfortably without needing additional accessories.

Bluetooth Remote and Convenient Remote Control

The included Bluetooth remote can be detached to control the gimbal from a distance of up to 10 meters. This makes it easier to take photos, start recording, and control the device without having to approach the tripod. The remote operates for up to approximately 12 hours of continuous use and charges in about 2 hours. The magnetic mount keeps the remote control within easy reach and makes it easy to store.

Foldable design and long battery life

When folded, the gimbal has compact dimensions of 330 × 112 × 44 mm and weighs approximately 597 g, so it fits easily into a bag or backpack. Two 800 mAh lithium-ion batteries provide up to 7.5 hours of runtime, and a full charge takes about 2 hours. The foldable design makes it easy to transport and store, which you'll especially appreciate when traveling. It's a practical solution for those who want to have a stabilizer always at hand.

Included

- AOCHUAN V3 Gimbal
- AI module with LED light
- Magnetic Bluetooth remote control
- Storage case
- USB-C cable
- Gimbal user manual
- LED light user manual

Manufacturer	AOCHUAN
Model	V3
Color	Black
Device type	3-axis smartphone gimbal
Maximum load capacity	Up to 330 g
Compatible phone width	55-85 mm
Compatible phone thickness	Up to 10.5 mm
Pan rotation range	360°
Maximum arm length	130 cm
Maximum height of the set	180 cm
Gimbal operating time	up to 7.5 hours
Gimbal charging time	approximately 2 hours
