

Phillips PR-860 1080p Projector (White)

Model: PR-860

Manufacturer: PHILIPS

EAN: 7640186962575

Product Code: 1251721

R20,302

Philips PR-860 1080p Projector (White)

The Philips PR-860 1080p projector combines native Full HD resolution of 1920 × 1080 pixels, brightness of up to 2600 lumens, and DLP technology with an energy-efficient LED light source. It displays images up to 150 inches in size, offering sharp details and clear text for both business presentations and evening movie screenings. With a light source lifespan of up to 30,000 hours, you can use the projector for many years without needing to replace the lamp.

Cinema-quality Full HD image

Full HD resolution ensures a sharp image, clear subtitles, and good detail clarity, which is crucial when displaying presentations, spreadsheets, or video content. Brightness up to 2,600 lumens and a 1,500:1 contrast ratio help ensure a clearly visible image in various lighting conditions. The projector can display an image up to 150 inches in diagonal, making it a successful replacement for large conference screens and TVs.

30,000 hours without replacing the light source

The LED light source eliminates the need for regular lamp replacement and ensures long, trouble-free operation. In Eco mode, the projector can operate for up to 30,000 hours, and in normal mode for up to 20,000 hours. This means years of use while maintaining stable image quality and lower operating costs.

Clear sound right out of the box

The built-in 5W speaker delivers clear sound during presentations and everyday movie viewing. This practical solution allows you to use the projector immediately after connecting it—without the need for additional speakers. If you need a more robust sound system, simply connect external equipment via the 3.5mm audio output.

Perfect image without time-consuming setup

The PR-860 allows for manual focus adjustment and keystone correction, making it easy to quickly adapt the image to the room's conditions. The 0.8x–2.0x digital zoom allows you to precisely adjust the projection size without having to reposition the device. With dimensions of 302 × 218 × 99 mm and a weight of 2.3 kg, the projector remains portable and easy to set up in various locations.

Ready for any image source

Two HDMI inputs allow you to connect two signal sources simultaneously, such as a laptop and a media player. The USB-A port can power external devices and support external drives, while the 3.5 mm audio output lets you connect headphones or an external sound system.

Included:

- Projector
- Remote control
- 2 AAA batteries for the remote control
- 4 AC power cables with AUS, EU, UK, and US plugs
- Quick start guide
