AMZCHEF CE-T-74IB3xyzf-CS Induction Cooktop, 3 Zones

The AMZCHEF CE-T-74IB3xyzf-CS induction cooktop is a modern 60-cm-wide built-in model equipped with 3 independent cooking zones with a total power output of 7400 W. The largest zone, with a diameter of 280 mm, has a base power of 3000 W, which increases to 3700 W when the Boost function is activated, ensuring rapid heating of large pots and pans. The appliance offers 9 power levels, a dedicated defrost function, intuitive LED touch controls, independent timers for each zone, and advanced safety systems. The elegant glass-ceramic surface blends perfectly with modern kitchen cabinets, and the compact design allows for convenient use of workspace.

Three independent cooking zones for everyday cooking

The cooktop is equipped with three cooking zones that can be operated independently of one another. This allows you to prepare several components of a meal simultaneously without having to wait for space to become available on the cooktop. This solution works well for both everyday dinners and preparing more elaborate meals for larger groups. The large 280-mm heating zone allows for comfortable use of larger cookware, which will be appreciated by those who frequently cook for the whole family.

Precise Power Control and Boost Function

The AMZCHEF CE-T-74IB3xyzf-CS offers 9 power levels, allowing you to precisely adjust the heating intensity to suit the type of dish you're preparing. The largest cooking zone operates at 3000 W, and when the Boost function is activated, it reaches as high as 3700 W, which significantly reduces cooking and heating times. The other zones are also equipped with a power boost function, allowing you to quickly bring water to a boil or sear ingredients intensely. This flexibility makes the cooktop ideal for both slow cooking and fast-paced meal preparation.

Dedicated Melting Function

The cooktop features a special melting setting that allows you to safely heat delicate ingredients requiring low temperatures. This function is ideal for melting butter or chocolate, or for preparing sauces that require precise heat control. It reduces the risk of burning ingredients and helps maintain their proper consistency. This makes preparing desserts and more demanding dishes easier and more convenient.

Safe and Energy-Efficient Induction Technology

Induction technology generates heat directly within the cookware, allowing energy to be used more efficiently than with traditional stovetops. Less residual heat enhances safety and makes cooking more comfortable. The built-in cookware detection system automatically recognizes compatible pots and pans and turns off the cooking zone when none are detected. Additionally, the appliance is equipped with overheat protection and a child lock to prevent accidental changes to the settings.

Timer and Convenient Touch Controls

The modern LED touch panel allows for quick management of all the appliance’s functions. Each cooking zone has its own timer adjustable from 1 to 99 minutes, allowing you to precisely control cooking times. Once the countdown ends, the selected zone automatically turns off, enhancing convenience and safety. The digital display provides a clear overview of the active settings, and the intuitive button layout makes operation simple and comfortable.

Included in the set

- AMZCHEF CE-T-74IB3xyzf-CS induction cooktop
- User manual

Manufacturer	AMZCHEF
Model	CE-T-74IB3xyzf-CS
Device type	built-in induction cooktop
Number of cooking zones	3
Total power	7400 W
Voltage	220 V
Controls	touchscreen
Display	LED, digital
Power levels	9
Boost function	Yes
