AMZCHEF CE-T-74IB4xyzf-CS 4-Zone Induction Cooktop

The AMZCHEF CE-T-74IB4xyzf-CS induction cooktop is a modern built-in appliance that combines high power (7400 W), four independent cooking zones, and intuitive touch controls. The model features two 1600 W zones with a Boost function up to 2000 W and two 2100 W zones with a Boost function up to 2600 W, allowing you to adjust the heating intensity to suit various cooking methods. Users have access to 9 power levels, individual timers ranging from 1 to 99 minutes, a child lock, overheat protection, and a cookware detection feature. The elegant black ceramic surface and built-in design ensure that the cooktop blends perfectly with modern kitchens.

Four independent zones for convenient preparation of multiple dishes

The cooktop is equipped with four independently operating cooking zones, allowing you to prepare several different dishes at the same time. This feature significantly streamlines everyday cooking, especially when preparing family dinners or larger meals. Independent control of each zone allows you to precisely adjust the temperature to suit a specific type of dish. This means you can cook pasta, fry meat, simmer vegetables, and heat up sauce all at the same time without losing control over the cooking process.

High power and the Boost function speed up cooking

The appliance's total power is 7,400 W, which ensures that cookware heats up quickly and meals are prepared efficiently. The cooktop features two 1,600 W cooking zones that reach 2,000 W when the Boost function is activated. The other two zones offer 2,100 W of power and can be temporarily increased to 2,600 W thanks to Boost mode. This function operates for up to 5 minutes, allowing you to bring water to a boil faster, preheat a pan, or reduce the preparation time for more demanding dishes.

9 power levels for full temperature control

Precise power adjustment allows you to tailor settings to various cooking techniques. Lower levels are ideal for gentle heating, melting ingredients, or slow simmering. Higher settings allow for quick frying, boiling, and intense heating of food. Thanks to the wide range of adjustments, users can more easily control the cooking process and achieve consistent results.

Intuitive operation with an LED touch panel

The modern LED control panel provides quick access to all of the appliance's functions. The touchscreen interface allows you to conveniently adjust power levels, activate the Boost function, and set the cooking time for each cooking zone. Each zone is equipped with an independent timer ranging from 1 to 99 minutes. Once the set time has elapsed, the selected zone turns off automatically, which enhances user comfort and helps prevent food from burning.

Safety in Everyday Use

Induction technology generates heat directly in the base of the cookware, so the hob’s surface heats up much less than in traditional cooktops. This reduces residual heat and improves the appliance’s energy efficiency. The cookware detection feature automatically recognizes the presence of a compatible pot or pan and turns off the cooking zone when the cookware is removed. Additional overheating protection and a child lock enhance safety in homes with children.

Elegant Surface and Easy Cleaning

The black ceramic surface gives the appliance a modern look and blends well with various kitchen designs. The smooth texture makes it easy to remove stains caused by cooking. The heat-resistant material retains its aesthetic appeal even with heavy use. The cooling system, featuring a quiet fan, helps maintain stable operating conditions and ensures the appliance’s long service life.

Compact built-in design

The CE-T-74IB4xyzf-CS model is designed for installation in a kitchen countertop. With a width of 60 cm, the cooktop works well in both larger and more compact kitchens. The built-in design helps maintain an aesthetic and cohesive look for your workspace. The unit’s low profile further facilitates its integration into modern kitchen cabinetry.

Included in the set

- AMZCHEF CE-T-74IB4xyzf-CS induction cooktop
- User manual

Manufacturer	AMZCHEF
Model	CE-T-74IB4xyzf-CS
