AMZCHEF CE-FS-I72S-FFDD06 Induction Cooktop, 4 Cooking Zones

The AMZCHEF CE-FS-I72S-FFDD06 induction cooktop is a modern 60-cm-wide built-in model equipped with four cooking zones with a total power of 7200 W. The appliance features the FlexZone function, which allows you to combine adjacent zones into larger cooking areas, making it easy to use large pots, roasting pans, or grill pans. Intuitive touch controls, a Boost function for faster heating, and a practical timer make everyday meal preparation easier. The entire unit is finished with elegant black ceramic glass that is heat-resistant and easy to keep clean.

Flexible cooking zones that adapt to your cookware

The AMZCHEF CE-FS-I72S-FFDD06 model is equipped with four induction zones that can operate independently or be combined into two larger FlexZone zones. This solution allows for convenient use of non-standard cookware that is longer or wider. When preparing dishes in grill pans or large roasting pans, heat is distributed evenly across the entire surface of the cookware. This gives users greater freedom in cooking and the ability to better adapt the cooktop to their current culinary needs.

Faster Cooking with the Boost Function

Each cooking zone is equipped with a Boost function that allows for a temporary increase in heating power. This brings water to a boil faster and reduces the time needed to prepare many dishes. This is particularly useful during intensive cooking or when you need to heat a dish quickly. Shorter heating times also translate to greater user comfort and more efficient workflow in the kitchen.

Convenient Controls and Modern Design

The touchscreen control panel is designed to make operating the appliance intuitive and convenient for every user. The clear interface allows you to quickly set the power level, activate additional functions, and program the operating time. The built-in design allows the cooktop to blend seamlessly with kitchen cabinetry, creating a modern and uncluttered countertop appearance. The black ceramic surface gives the appliance an elegant look while also making daily maintenance easier.

Safety features for greater peace of mind

The cooktop is equipped with features that enhance safety during everyday cooking. The timer allows you to control cooking times without having to constantly monitor the appliance. The overheat protection monitors the cooktop's operation and helps protect its components from excessive strain. Additionally, the auto-shutoff feature and control panel lock enhance the safety of household members and reduce the risk of accidentally turning on the appliance.

High Power and Efficient Induction Technology

With a total power output of 7200 W, the cooktop performs well in both everyday cooking and the preparation of more demanding meals. Induction technology transfers energy directly to the bottom of the cookware, which reduces heat loss and shortens cooking times. Efficient energy use enhances user comfort and provides greater control over the cooking process. The appliance’s standard dimensions make it easy to install in most modern kitchen cabinets.

Included

- AMZCHEF CE-FS-I72S-FFDD06 Induction Cooktop
- User manual

Manufacturer	AMZCHEF
Model	CE-FS-I72S-FFDD06
