AMZCHEF CE-T-72CB4xyP200-LBHA Ceramic Cooktop, 4 Cooking Zones

The AMZCHEF CE-T-72CB4xyP200-LBHA ceramic cooktop is a modern built-in appliance that offers 4 cooking zones with a total power of 7200 W, ensuring fast and convenient meal preparation. The model features a dual 2200 W cooking zone and an oval 2000 W zone, making it ideal for cooking in large pots as well as using roasting pans or grill pans. Intuitive touch controls, 9 power levels, a pause function, and an individual timer for each zone allow you to precisely control the cooking process. The matte ceramic glass surface is fingerprint-resistant, easy to clean, and blends perfectly with modern kitchen cabinets.

Flexible cooking zones for various uses

The cooktop is equipped with four powerful cooking zones that allow you to prepare several dishes at the same time. The 2200 W dual cooking zone lets you bring water to a boil quickly and make efficient use of larger pots. The 2000 W oval zone is designed for non-standard-shaped cookware, such as roasting pans, electric grills, or fish pans. This gives users greater freedom while cooking and makes it easier to adapt the cooking surface to the type of dish being prepared.

Precise Temperature Control

Nine power levels allow you to precisely adjust the temperature to suit a specific cooking technique. Lower settings are ideal for warming food, melting butter, or preparing delicate sauces. Higher levels enable quick frying and cooking large quantities of food in a short amount of time. Each heating zone can be controlled independently, making it easy to prepare several ingredients simultaneously that require different temperatures.

Convenient Features for Everyday Use

The AMZCHEF CE-T-72CB4xyP200-LBHA is equipped with a timer that can be set from 1 to 99 minutes for each heating zone. Once the countdown ends, the selected zone turns off automatically, which helps prevent food from burning and enhances user comfort. Another useful feature is the pause function, which allows you to temporarily stop the cooking process without losing your saved settings. This lets you return to preparing your meal at your own pace, using exactly the same operating parameters.

Safety While Cooking

The appliance offers features that help enhance safety in everyday kitchen use. The child lock prevents the control panel from being accidentally activated or settings from being changed. The overheating protection system monitors the appliance's operation and reduces the risk of excessive temperature increases. Additionally, the hot surface indicator shows which zones remain hot after the appliance has finished operating. These features allow you to use the cooktop in a more comfortable and safe manner.

Easy-to-clean matte ceramic glass

The cooktop’s surface is made of ceramic glass with a matte finish, which stands out with its modern look. The matte texture minimizes the visibility of fingerprints and minor marks from everyday use. Thanks to its smooth surface, dirt can be quickly removed with a soft cloth and appropriate cleaning products. This is a practical solution for those who value aesthetics and easy maintenance of kitchen appliances.

Ideal for modern kitchen cabinetry

The cooktop is designed for under-counter installation, creating a seamless and aesthetically pleasing work surface. The unit measures 59 × 52 × 6 cm, allowing for installation in many standard kitchen setups. This model is compatible with various types of cookware, including those made of stainless steel, aluminum, cast iron, and ceramic. This allows you to use your existing pots and pans without having to replace your entire kitchen set.

Manufacturer	AMZCHEF
Model	CE-T-72CB4xyP200-LBHA
