AMZCHEF CE-FS-I74S-FFDD10 4-Zone Induction Cooktop

AMZCHEF CE-FS-I74S Induction Cooktop-FFDD10 is a modern 60-cm-wide built-in model equipped with 4 cooking zones with a total power of 7400 W, two flexible FlexZone zones, a Boost function, and intuitive touch controls. The ability to combine cooking zones allows for convenient use of larger cookware, and 9 power levels enable precise adjustment of operating parameters to suit various cooking techniques. Additional features include a keep-warm function, a pause function, and a timer up to 99 minutes. The entire unit is made of durable ceramic glass, which is resistant to high temperatures and easy to keep clean.

Flexible heating zones adapted to various cookware

The AMZCHEF CE-FS-I74S-FFDD10 cooktop is equipped with two FlexZone zones, which allow you to combine adjacent heating zones into a larger cooking surface. This feature is ideal for preparing dishes in large pots, roasting pans, or long grill pans. As a result, heat is distributed evenly across a larger surface area of the cookware, making cooking more convenient. The cooktop is compatible with cookware that has a magnetic base, such as cast iron, stainless steel with magnetic properties, and enameled iron. Additionally, the BBQ mode helps maintain the proper surface temperature of the pan while grilling.

High Power and Fast Heating

The appliance's total power of 7400 W allows you to efficiently prepare everyday meals. The Boost function enables a temporary increase in the power of a selected cooking zone, thereby reducing the time needed to boil water or for high-heat frying. Users have access to 9 power levels, allowing for precise control over the cooking process. As a result, the cooktop performs well for both gentle heating and more demanding culinary applications.

Convenient Operation Every Day

The model is equipped with four independent touch control panels that allow for convenient management of each cooking zone. The keep-warm function maintains the proper temperature of prepared dishes without the need for reheating. Another useful feature is the pause function, which allows you to temporarily stop the appliance and resume cooking with the previously set parameters. A modern, next-generation ventilation system limits noise levels to a maximum of 56 dB, ensuring a more comfortable cooking experience.

Safety

The cooktop is equipped with a range of features that enhance safety during everyday use. The built-in timer allows you to set the operating time up to 99 minutes, making it easier to monitor the dishes you're preparing. Overheating protection helps safeguard the appliance from damage during intensive use. Additional protection is provided by the automatic shut-off feature and the safety lock, which is particularly useful in homes with children.

Durable Construction and Easy Cleaning

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The cooktop surface is made of ceramic glass that is resistant to high temperatures and daily use. The smooth texture of the material makes cleaning quick and convenient. The elegant black finish blends well with modern kitchen designs. This model is designed for built-in installation and must be connected directly to the electrical system, as it does not come with a plug.

Included in the set

- AMZCHEF CE-FS-I74S-FFDD10 induction cooktop
- User manual
