

Flextail Max Pump 3 Portable Pump (Black)

Model: Max Pump 3-B

Manufacturer: FLEXTAIL

EAN: 6975755965062

Product Code: 1255534

R1,897

Flextail Max Pump 3 Portable Pump (Black)

The Flextail Max Pump 3 is a compact electric pump that combines a small size with impressive performance. The device weighs just 122 g and measures 84 × 48 × 48 mm, so it fits easily in a backpack or pocket. It generates up to 5 kPa of pressure and an airflow of 500 l/min, allowing you to quickly inflate mattresses, pillows, or water toys. The built-in 7.215 Wh battery provides up to 60 minutes of runtime, and the additional lighting feature offers up to 11 hours of operation, making the device ideal for both inflating gear and serving as a practical flashlight in the field.

Fast Inflation and Deflation

The Max Pump 3 offers both inflation and deflation modes, which significantly simplifies the preparation and packing of camping gear. The device generates a pressure of up to 5 ± 0.5 kPa in premium mode or 3 ± 0.5 kPa in basic mode. High airflow (500 l/min) allows you to quickly inflate various accessories—for example, a travel pillow in about 5 seconds, water toys in 70 seconds, a

single-person mattress in 70 seconds, and a double mattress in about 178 seconds. Thanks to the deflation function, you can also quickly release air, which significantly speeds up packing after a camping trip.

Compact and perfect for travel

Its lightweight design makes the pump ideal for outdoor adventures. Weighing just 122 g, it's comparable to small electronic accessories, so you can easily clip it to your backpack using the built-in hook or tuck it into a pocket. The integrated USB-C port allows for convenient charging, and the charging indicator shows the current charge level.

Built-in camping light

The Max Pump 3 also serves as a practical light source. The lamp's transparent design increases the light-emitting surface, and three brightness levels let you adjust the lighting to your needs. In main mode, the range is 10–200 lm; ambient mode offers 100 lm; and maximum brightness is 300 lm (combining both modes). Depending on the settings, the light can operate for up to 11 hours, serving as a flashlight, tent light, or table lamp.

Versatile outdoor use

Thanks to its various operating modes, the device is useful in many situations. The pump allows you to inflate, deflate, and blow air, as well as compress vacuum bags or remove dust from devices. It's a practical tool for camping, traveling, at home, or when organizing outdoor gear.

6 nozzles for various applications

The set includes 6 interchangeable nozzles that allow you to adapt the pump to various valves and accessories. The nozzles enable you to inflate water toys, pillows, and travel mattresses, as well as use compression bags. The set also includes a tripod adapter, allowing the device to be used as a lamp on a tripod.
