NAVEE GT5 Max Electric Scooter

The NAVEE GT5 Max electric scooter is a modern model designed for people who expect a long range, high power, and a comfortable ride for everyday use. The motor, with a rated power of 700 W and a maximum power of 1638 W, ensures dynamic acceleration and allows you to efficiently tackle inclines of up to 28%. The 46.8 V battery with a capacity of 596 Wh allows you to travel up to 90 km on a single charge when riding at a leisurely pace, and at a speed of 20 km/h, it offers a real-world range of approximately 65 km. Comfort is enhanced by front and rear suspension, 10-inch (25.4 cm) tubeless tires, and a wide deck. Safety is ensured by a triple braking system with EABS, TCS traction control, turn signals, and comprehensive lighting. Additionally, the scooter works with the NAVEE mobile app, supports Bluetooth and Apple Find My, and has an IPX5 water resistance rating.

Long Range and Fast Charging

The NAVEE GT5 Max is equipped with a 596 Wh battery, allowing you to cover long distances without frequent recharging. This solution works well for both daily commutes to work and longer trips

around the city and surrounding areas. Under optimal conditions, the scooter can travel up to 90 km, which provides great freedom and reduces the need to constantly check the battery level. Charging takes about 5–6 hours, which is a very good result for a battery of this capacity and allows you to conveniently prepare the vehicle for the next day of use.

Powerful motor and efficient hill climbing

The motor located in the rear wheel generates 700 W of rated power and as much as 1638 W of maximum power. Thanks to this, the scooter responds quickly to throttle input and maintains good dynamics even under load. The ability to climb slopes with a gradient of up to 28% means that steep inclines, overpasses, or hilly terrain are no major problem. Rear-wheel drive improves traction, resulting in more stable and predictable handling.

Riding comfort on city streets and uneven surfaces

The suspension front fork and rear shock absorber with a hydraulic cylinder effectively dampen vibrations and reduce shocks. This makes riding on cobblestones, uneven asphalt, or transverse bumps much more comfortable. The 10-inch tubeless tires, with a diameter of 25.4 cm, offer good traction and greater puncture resistance. Their design improves stability and supports smooth handling on both smooth streets and more challenging surfaces.

Triple braking system and traction control

The NAVEE GT5 Max utilizes an advanced braking system consisting of a front drum brake, a rear disc brake, and an electronic EABS system. This combination ensures effective and consistent deceleration in various weather conditions. The TCS traction control system limits wheel slip on wet or slippery surfaces, improving stability when starting and accelerating. This makes everyday riding more predictable and safe.

Advanced lighting and improved visibility

The scooter is equipped with a 4W front headlight featuring Auto-Sensing, which automatically turns on the light after dark or in low-light conditions. The 2W rear brake light clearly signals braking, increasing safety in urban traffic. The 1.6W turn signals make it easier to communicate your

intention to turn to other road users. The comprehensive lighting system improves the rider’s visibility and makes riding after dark easier.

Smart features and convenient operation

The clear LED display shows key information such as speed, battery charge level, active riding mode, and lighting status. Bluetooth connectivity allows you to connect to the NAVEE app, which lets you monitor the scooter’s parameters and manage selected settings. Integration with Apple Find My makes it easy to locate the vehicle if it is lost or stolen. Additionally, the scooter features an electronic security lock that enhances protection when parked.

Robust construction for everyday use

The NAVEE GT5 Max weighs approximately 24.8 kg and is designed with stability and durability in mind. A maximum load capacity of 130 kg allows a wide range of users to comfortably enjoy the scooter. The IPX5 water resistance rating protects key components from rain and splashes, enhancing reliability during daily use. The foldable design makes it easy to store and transport in a car trunk.

Manufacturer	NAVEE
Model	GT5 Max
Product type	electric scooter
Rated motor power	700 W
Maximum motor power	1638 W
Drive	rear wheel
Maximum speed	20 km/h
Maximum range	up to 90 km (at 15 km/h)
Battery	46.8 V / 596 Wh
Charging time	5-6 hours

Maximum climbing gradient 28%

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Tires	10-inch (25.4 cm) tubeless
Suspension	front suspension fork + rear shock absorber with hydraulic cylinder
Brakes	Front drum + rear disc + EABS
Traction control	TCS
Water resistance rating	IPX5
Display	LED
Connectivity	Bluetooth
Mobile app	NAVEE App
Apple Find My	Yes
Turn signals	Yes, 1.6 W
Front light	4 W with Auto-Sensing function
Rear brake light	2 W
Maximum load	130 kg
Weight	24.8 kg
Dimensions when unfolded	1198 × 600 × 1280 mm
Dimensions when folded	1198 × 610 × 580 mm
