NAVEE GT5 Pro Electric Scooter

The NAVEE GT5 Pro is a modern electric scooter designed for daily commutes and convenient city travel. It is equipped with a motor rated at 600 W and delivering a maximum of 1350 W, which, thanks to its rear-wheel drive, ensures smooth acceleration and good stability while riding. The 46.8 V battery with a capacity of 561 Wh allows you to travel up to 75 km on a single charge, and a top speed of 20 km/h makes the scooter ideal for urban environments. The model features front fork suspension and a single rear shock absorber, 10-inch (25.4 cm) tubeless tires, TCS traction control, turn signals, a front drum brake, and rear EABS. Additionally, the user gets compatibility with Apple Find My, FlyLock technology, IPX5 water resistance, a smart LED display, and a foldable design measuring 119.8 × 60 × 128 cm when unfolded and 119.8 × 61 × 58 cm when folded.

Long range and a powerful battery for every season

The NAVEE GT5 Pro is equipped with a 561 Wh battery, which, under favorable conditions, allows for a range of up to 75 km on a single charge. This range makes it convenient to commute to work or

school or take longer trips without having to plug in frequently. The Navee Long-Range system optimizes battery and motor performance as well as rolling efficiency, ensuring energy is used more effectively. An additional advantage is the battery's increased performance in low temperatures—at -15°C, it retains up to 90% of its capacity, which translates to approximately 10% better efficiency compared to standard solutions. A full charge takes about 7 hours, so the scooter can be ready for the next day of use.

Powerful motor and stable rear-wheel drive

At the heart of the scooter is a motor with a rated power of 600 W, which reaches up to 1350 W at peak performance. These specifications ensure smooth acceleration and a seamless ride even on more challenging sections of the route. The rear-wheel drive improves traction and stability, which is particularly noticeable during acceleration and when climbing inclines of up to 24%. The user can choose from three riding modes, adjusting the scooter's performance to the conditions and their own preferences. A top speed of up to 20 km/h makes this model well-suited for everyday city riding.

Riding comfort on uneven surfaces

The NAVEE GT5 Pro was designed for comfortable travel on various types of surfaces. The front suspension fork and single rear shock absorber effectively reduce vibrations and improve stability while riding. The 10-inch (25.4 cm) tubeless tires offer good traction and increased puncture resistance, which translates to greater confidence during everyday use. The wide deck ensures a stable footing, making longer rides more comfortable. The entire design has been refined to ensure a smooth and predictable ride on city streets.

Advanced safety systems

The scooter is equipped with a TCS traction control system, which helps maintain traction on wet or slippery surfaces. Effective braking is provided by a front drum brake working in conjunction with the rear electronic EABS system, which improves vehicle control and shortens stopping distance. The model also features FlyLock technology, which enhances security and helps protect the scooter against unauthorized use. 1.6W turn signals make it easy to signal maneuvers, and compatibility with Apple Find My allows you to easily locate the vehicle using Apple devices. Thanks to its IPX5 water resistance rating, the scooter is splash- and rain-resistant, making it well-suited for everyday

use.

Smart lighting and a clear display

The NAVEE GT5 Pro is equipped with a 4W front light featuring Auto-Sensing, which automatically turns on after dark or in low-light conditions. At the rear is a 2W brake light that increases visibility when braking. The centrally located LED display shows key information such as current speed, battery level, mileage, and active riding mode. Bluetooth connectivity and the NAVEE app allow you to monitor the scooter’s parameters and manage selected functions. This gives the user full control over the vehicle in any situation.

Robust construction and practical folding

The scooter’s design is tailored for daily use and easy storage. The NAVEE GT5 Pro weighs approximately 24.9 kg and can carry a rider and luggage with a combined weight of up to 130 kg. When unfolded, the scooter measures 119.8 × 60 × 128 cm, ensuring a comfortable riding position. When folded, its dimensions are 119.8 × 61 × 58 cm, making it easier to store in an apartment, office, or car trunk. A sturdy frame, wide deck, and refined details make this model well-suited as a means of daily transportation.

Manufacturer	NAVEE
Model	GT5 Pro
Rated motor power	600 W
Maximum motor power	1350 W
Drive	rear-wheel drive
Maximum speed	up to 20 km/h
Maximum range	up to 75 km
Battery	46.8 V, 561 Wh
Charging time	approx. 7 hours

Maximum climbing gradient 24%
