

# NAVEE V45i Electric Scooter

Model: V45i (DE)

Manufacturer: NAVEE

EAN: 6975293679162

Product Code: 1255669

## R8,085

### NAVEE V45i Electric Scooter

Forget about traffic jams and enjoy getting around the city with ease. The NAVEE V45i electric scooter combines a maximum power output of 800 W, a range of up to 45 km (at a speed of 15 km/h), and a top speed of 20 km/h, making it ideal for both daily commutes and recreational rides. Confident handling is ensured by 10-inch tubeless tires and a dual braking system with EABS, while the foldable design, automatic lighting, LED display, and NAVEE app integration enhance user convenience.

### Freedom for Daily Commutes

The NAVEE V45i electric scooter offers a range of up to 45 km (at a speed of 15 km/h), allowing you to cover long distances. It takes about 6 hours to fully charge the battery, minimizing downtime between trips. The motor, with a maximum power of 800 W, efficiently accelerates the scooter to 20 km/h and makes it easy to ride on varied terrain. Its ability to climb slopes with a gradient of up to 20% means you'll have no trouble handling the uphill sections encountered during your daily

commute, giving you a comfortable and efficient means of transportation for everyday use.

## **Confident Riding on Any Surface**

Safety and riding comfort are enhanced by 10-inch tubeless tires, which ensure stable contact with the road surface and provide greater handling confidence during daily commutes. A wider contact patch improves traction, and the tubeless design significantly reduces the risk of sudden punctures. Effective deceleration is ensured by a combination of a sealed rear drum brake and the front EABS system, which provides smooth and reliable braking regardless of weather conditions.

## **Stay Visible at All Times**

Visibility while riding is ensured by a comprehensive lighting system that enhances safety both during the day and after dark. The front light with an automatic on/off function adjusts to ambient conditions, so you don't have to remember to turn it on manually. The scooter is also equipped with a rear brake light, turn signals, and reflective elements on the sides, which improve the rider's visibility and make it easier to signal maneuvers to other road users.

## **Reliable battery protection while riding**

The intelligent BMS system ensures safe and stable battery operation, increasing its reliability and lifespan. A 6-stage protection system safeguards against short circuits, current overloads, overcharging, over-discharging, and abnormal operating temperatures. Additionally, the automatic low-voltage protection mode helps safeguard the battery, ensuring its long and trouble-free operation.

## **Modern technologies always at your fingertips**

The scooter's practical features enhance comfort and safety on every ride. The TCS Anti-Slip system supports riding stability, helping to reduce the risk of slipping, while the IPX5-rated waterproof design provides greater freedom to use the device in various conditions. Users also have access to a clear LED display and the NAVEE app, which make it easy to use the available features and monitor key information.
