

# AMZCHEF CE- GC-CP024-BU Portable Coffee Maker

Model: CE-GC-CP024-BU

Manufacturer: AMZCHEF

EAN: 5905156109612

Product Code: 1257918

## R2,624

### AMZCHEF CE-GC-CP024-BU Portable Coffee Maker

The AMZCHEF CE-GC-CP024-BU portable coffee maker is a cordless device with 20 bar pressure, equipped with a water heating function up to approx. 92°C (heating time approx. 200 seconds), a 9000 mAh USB-rechargeable battery (approx. 3 hours to fully charge), and an LCD display. The model supports Nespresso capsules and ground coffee (up to 12 g), offering a capacity of 40–80 ml and two brewing modes. On a single charge, you can make 3–4 coffees using cold water or even over 200 coffees using hot water. The entire unit is housed in an aluminum casing approximately 23 cm tall and weighing about 725 g.

### Compact and truly portable

The compact design, standing about 23 cm tall, means the coffee maker fits easily into a backpack or car cup holder. Weighing just 725 g, you can take it with you without feeling the weight, which is important when traveling or commuting daily. The built-in battery eliminates the need for a power outlet, allowing the device to work wherever you need it. As a result, you gain complete freedom to prepare coffee regardless of location. The aluminum housing increases damage resistance and gives the device a sturdy character. The design allows for quick disassembly of components, making it easy to clean thoroughly after each use.

## **20-bar pressure - a richer coffee flavor**

The 20-bar pressure pump ensures proper coffee extraction, resulting in an intense flavor and a distinct crema. This means the brew isn't flat or watered down, but closer to an espresso from a classic machine. The ability to use up to 12 g of ground coffee allows you to further adjust the strength of the drink. In practice, this means greater control over the final result.

## **Heating function and impressive capacity**

The coffee maker heats water to approximately 92°C in about 200 seconds, allowing you to prepare coffee without first boiling the water. This feature is particularly useful when traveling, where access to a kettle is often limited. The battery capacity allows for the preparation of 3-4 cups using cold water, while when using boiling water, this number increases to over 200 cups. This difference gives the user a choice between complete independence and maximum efficiency.

## **Capsules and Ground Coffee**

The 2-in-1 design allows you to use both Nespresso-style capsules and ground coffee. This means you're not limited to a single system and can adapt your brewing method to the situation. Capsules are ideal when speed and convenience matter, while ground coffee offers greater control over the flavor. This solution enhances the machine's versatility in everyday use.

## **Clear LCD display**

The LCD display shows the temperature, battery level, and current operating mode, making it easy to control the machine. This means you don't have to guess whether the coffee maker is ready to
