The MSI MAG A1200PLS PCIE5 is a fully modular 1200 watt power supply designed for high-performance PC and server builds. It delivers stable multi-rail output across +3.3 V, +5 V, and +12 V rails while providing a dedicated 16-pin 12VHPWR connector for next-generation PCIe 5.0 graphics power. The unit combines 80 PLUS Platinum efficiency with Cybenetics Platinum rating to help reduce energy waste and operating heat. Built-in protections including overpower, overcurrent,

overheat, overvoltage, undervoltage, short-circuit, surge, and inrush protection help safeguard components, and no-load operation protection adds system compatibility. The PSU includes a 135 mm fluid dynamic bearing fan for lower acoustic levels and long life, and fully modular black, embossed cables with copper alloy contacts and a cable organizer for cleaner installations and reliable connectivity.
