NAVEE K100 Electric Scooter

The NAVEE K100 electric scooter is designed for children aged 6 to 10 who want to stay active and gradually develop their riding skills. The motor, with a rated power of 130 W and a maximum power of 160 W, allows the scooter to reach speeds of up to 16 km/h, while the 21.6 V battery with a capacity of 55 Wh provides a range of up to 14 km on a single charge. The model weighs only 8.6 kg, can handle a load of up to 50 kg, and offers three riding modes tailored to the child's skill level. It also features 7-inch (approx. 18 cm) tubeless tires, a 4-inch (approx. 10 cm) LED display, colorful RGB backlighting, and the ability to control settings via the NAVEE app.

Three riding modes tailored to the child's skill level

The NAVEE K100 offers three riding modes that can be quickly switched by double-tapping the power button. Standard mode limits the speed to 12 km/h, which is ideal for learning and leisurely rides. Sport mode allows for a maximum speed of 16 km/h, while assist mode provides smooth support when starting off. This allows the scooter to grow with your child and safely build confidence as they

progress through the learning stages.

130 W motor and a range of up to 14 km

The 130 W motor ensures smooth acceleration and stable performance during daily rides on sidewalks and bike paths. The maximum power of 160 W allows for adequate momentum and the ability to climb hills with a gradient of up to 5%. The 21.6 V / 55 Wh battery allows for a range of up to 14 km during leisurely riding or approximately 9 km at a maximum speed of 16 km/h. A full charge takes about 3.5 hours, so the scooter is quickly ready for the next ride.

NAVEE App - Greater Control for Parents

The dedicated NAVEE app allows parents to set a speed limit appropriate for their child's age and skill level. From the app, you can also manage the RGB lighting and monitor basic riding parameters. This gives parents greater control over safety, while children can use the scooter in a way that suits their abilities. It's a practical solution that makes learning easier and provides greater peace of mind during everyday use.

Safe design created with children in mind

The NAVEE K100 is designed to be comfortable and safe for the youngest users. The rear drum brake with a lever sized for small hands makes it easy to stop quickly and safely. Soft grips made of TPR thermoplastic rubber improve grip and enhance riding comfort. The design, free of sharp edges and elements that could pinch fingers, allows children to use the scooter with greater freedom.

7-inch tubeless tires - comfort without pumping

The 7-inch (approx. 18 cm) Inner Hollow tires are puncture-resistant and do not require pumping. Their flexible structure helps better absorb minor bumps, making riding on sidewalks and paved paths more comfortable. No need to refill air means fewer chores for parents. It's a practical solution that works well for everyday use.

4-inch LED display and eye-catching RGB backlighting

The easy-to-read 4-inch (approx. 10 cm) LED display shows speed, battery level, and the current riding mode. This allows both the child and parent to quickly check the most important information. Colorful RGB lights located under the deck change colors while riding, giving the scooter an attractive look. The additional lighting also improves visibility after dark.

Durability confirmed by testing

The NAVEE K100 has undergone rigorous testing that confirms its durability in everyday use. The model has passed over 3,000 km of road tests and over 100 drop tests. The IPX4-rated housing protects the scooter from splashes, and the IPX7-rated battery compartment enhances safety in case of contact with water. As a result, the scooter is ready for heavy use and variable weather conditions.

Lightweight design and comfortable use

Weighing just 8.6 kg, the scooter is easy for parents to carry and store daily. With a maximum load capacity of 50 kg, the model can serve a child for several seasons. The stable construction and carefully selected specifications ensure comfort and safety while learning to ride. The NAVEE K100 combines functionality, durability, and an attractive design, providing children with plenty of fun on every ride.

Manufacturer	NAVEE
Model	K100
Product type	electric scooter for children
User age	6-10 years
Maximum load	50 kg
Rated motor power	130 W
Maximum power	160 W
Maximum speed	16 km/h
