Blitzwolf BW-V1 Ultra Projector

The BlitzWolf BW-V1 Ultra is a modern multimedia projector designed for users who want a large image, convenient operation, and a wide range of entertainment options in a compact form factor. The device supports Full HD 1080p resolution, offers 8,500 lumens of brightness, a 7,000:1 contrast ratio, modern Wi-Fi 6 connectivity, and a built-in Android 9.0 system with access to streaming apps and the Google Play Store. Thanks to its swivel design with an adjustable angle of up to 210°, dual stereo speakers, and intuitive operation, the projector is perfect for movie nights, watching sports, gaming, and family entertainment. This device offers great flexibility—no complicated setup and no need to invest in additional equipment.

Your favorite entertainment without extra devices—just turn it on and watch

You don't need a Smart TV box or external players to immerse yourself in the world of entertainment. The BlitzWolf BW-V1 Ultra offers a built-in streaming system with access to popular media apps and the Google Play Store, so you can watch movies, TV shows, sports broadcasts, and

online content directly from the projector. Netflix, YouTube, Prime Video, Disney+, Hulu, and many other platforms are always at your fingertips, and a vast library of apps lets you customize the device to your needs. It's a convenience that truly simplifies everyday use.

A bright, clear, and detailed image

A good projector should captivate you from the very first minute—and that's exactly what the BW-V1 Ultra does. Full HD 1080p support, 8,500 lumens of brightness, and a 7,000:1 contrast ratio translate to a clear image with well-defined details, better black depth, and a pleasant viewing experience for movies, dynamic broadcasts, and gaming alike. Manual focus adjustment allows you to quickly fine-tune the image to perfect sharpness, ensuring you always get a projection tailored to the conditions and distance.

Project wherever you want—wall, ceiling, or even more creative spaces

One of the BW-V1 Ultra's greatest advantages is its exceptionally flexible design with a projection angle adjustable up to 210°. This means the freedom to display the image practically anywhere you like—classically on a wall, on the ceiling during an evening screening in bed, or in less standard setups. Its compact form and portable design make it easy to move the projector between rooms, take it on a trip, or use it during outdoor gatherings.

Smooth streaming and a stable connection without annoying delays

Modern entertainment requires a fast and stable connection, which is why the BlitzWolf BW-V1 Ultra uses Wi-Fi 6 technology, compatible with both 5 GHz and 2.4 GHz networks. This means faster content loading, smoother playback of online content, and lower latency during streaming or gaming. Combined with built-in dual stereo speakers, the projector creates a complete entertainment center that requires no complicated technical setup.

Multiple uses—from home theater to family nights and sports excitement

The BlitzWolf BW-V1 Ultra excels in a variety of usage scenarios. It's the perfect choice for home theater, watching games with friends, kids' movie nights, multimedia presentations, or open-air movie nights. Easy operation, versatility, and a compact design make this a device that adapts to
