GODOX LUX Junior Retro Flash

The GODOX LUX Junior is a compact, retro-style flash. With a guide number of 12, a color temperature of 6000 K (± 200 K), compatibility with Canon, Fuji, Nikon, Olympus, Pentax, and Sony MIS cameras, plus the ability to operate in Manual, S1, S2, and Slave modes, make it ready for photo shoots almost anywhere. Its small size, AAA battery power, and timeless design make it perfect to take along on every walk, trip, or gathering to capture special moments.

Simple operation, more time for photography

Operating the flash has been simplified as much as possible, so you can focus on taking photos instead of fiddling with complicated settings. Manual mode lets you conveniently adjust the flash output using an intuitive dial, while the versatile Auto mode helps you select the right exposure. This solution works well with both digital and film cameras, allowing you to enjoy every shot to the fullest.

Flexible flash triggering and freedom of use

The GODOX LUX Junior offers several ways to trigger the flash. S1 mode triggers the flash when it detects a flash from another unit operating in manual or TTL mode, while S2 mode ignores the pre-flash and responds only to the actual flash, making it easier to work with a variety of lighting systems. M and Slave modes are also available, and an additional SYNC socket allows for wired triggering of the flash—the appropriate cable is included in the kit.

Eye-catching design

The LUX Junior proves that photography accessories can be not only practical but also stylish. Inspired by the aesthetics of the 1980s, the flash complements both modern digital cameras and classic analog models perfectly. Its distinctive look makes photography even more enjoyable, and the flash itself takes on a unique character that stands out during every shoot.

Ready to go wherever inspiration strikes

Its compact design and standard AAA battery power mean the LUX Junior is always ready to go. It fits easily into a camera bag or backpack, so you can take it with you while traveling, on walks, or to spontaneous get-togethers. This flash encourages you to shoot without limits and lets you focus on what matters most—capturing special emotions and unforgettable moments.
