GODOX iT30Pro N Flash for Nikon

The GODOX iT30Pro N Flash for Nikon is a compact TTL flash equipped with automatic exposure metering, a built-in Godox X 2.4 GHz wireless system, a touchscreen, HSS sync up to 1/8000 s, and a USB-C rechargeable battery. It weighs just 120 g, so it easily fits in a jacket pocket, small bag, or backpack. The model was designed for Nikon camera users who take photos while traveling, on assignment, and in everyday situations and need lightweight, convenient gear. The combination of compact dimensions and advanced features makes this flash a practical addition to any mobile photography kit.

Compact design built for field use

The Godox iT30Pro N is the first TTL mini flash in the manufacturer's lineup that combines a compact size with features found in larger models. Weighing just 120 g, it's easy to carry, even during a full day of shooting. Thanks to its compact housing, there's no need to carry an extra backpack just for the flash. This solution is particularly useful while traveling, on photo walks, and for photojournalism,

where mobility and quick access to equipment are essential.

TTL Automatic Exposure and Intuitive Operation

The advanced TTL mode analyzes the amount of light passing through the lens and automatically selects the appropriate flash output. This allows you to capture properly exposed photos even when lighting conditions change rapidly. Adjusting settings is made easy by the color touchscreen, which allows for convenient control of the most important functions. Additionally, the flash is equipped with an ergonomic dial that lets you precisely adjust the flash output in the traditional way.

Godox X Wireless System

The built-in Godox X 2.4 GHz transmitter and receiver allow the flash to operate in both Master and Receiver modes. Thanks to this, the iT30Pro N can control other compatible flashes or be triggered wirelessly without the need for additional modules. This solution makes it easier to set up mobile lighting rigs and increases flexibility when working on location and in dynamic photojournalism conditions. Wireless communication also allows you to set up your shooting position faster and reduce the number of additional accessories.

HSS and USB-C Rechargeable Battery

The flash supports HSS synchronization up to 1/8000 of a second, allowing you to use fast shutter speeds even in bright daylight. The Godox iT30Pro N is equipped with a 7.4 V lithium-ion battery with a capacity of 900 mAh. A full charge allows for up to 560 full-power flashes, and the recharge time is approximately 1.5 seconds. The USB-C port allows for convenient charging via a wall charger, computer, or power bank, which enhances usability while traveling. This solution makes it easy to prepare the flash for subsequent photo sessions without the need for external chargers.

Included in the set

- Godox iT30Pro N flash
- USB-C charging cable
- Carrying case
- Manufacturer's packaging
