ULTENIC AC1 Triflex Upright Vacuum Cleaner with Mopping Function

The ULTENIC AC1 Triflex is a cordless upright vacuum cleaner with a mopping function that combines vacuuming, washing, and mopping in a single pass. Its lightweight design, up to 60 minutes of runtime, automatic self-cleaning function, anti-tangle system, and ability to operate at a 180° angle make this device ideal for daily cleaning. The vacuum effectively removes both dry and wet dirt, and thanks to its edge-cleaning technology and intelligent voice prompts, it offers even greater ease of use.

Lightweight design and easy maneuverability

The AC1 Triflex model is designed to move freely between furniture and easily reach hard-to-reach areas. Weighing approximately 3.6 kg and featuring a swivel head with a 54° range of motion, the device glides smoothly across various types of floors. Reduced effort during cleaning translates to greater convenience and allows you to effectively keep even larger areas clean.

Vacuuming, mopping, and washing all at once

The ULTENIC AC1 Triflex was designed to remove both dry and wet dirt. The device effectively handles dust, pet hair, spilled cereal, crumbs, spilled coffee or milk, and messes left by pets. Combining multiple functions in a single machine reduces cleaning time and keeps floors clean every day.

Thorough cleaning along walls and baseboards

The special design of the cleaning head allows for cleaning right up against edges and along baseboards. Edge Cleaning technology effectively removes dirt from corners, spaces around furniture, and areas that standard vacuums have difficulty reaching. Thanks to its nearly gap-free design, you can thoroughly clean the entire floor surface without leaving any uncleaned gaps.

Slim design and the ability to clean under furniture

The vacuum cleaner can be extended to a 180° angle, which makes it much easier to clean spaces under beds, sofas, or dressers. The slim body allows you to easily reach places that are normally difficult to clean. This eliminates the need to move heavy furniture or use additional accessories.

System to Prevent Hair and Pet Hair from Tangling

The brush is equipped with a special system that minimizes tangling of hair and pet hair. This solution allows for the removal of debris as you go, which results in more effective cleaning and easier maintenance of the device. This is a particularly useful feature in homes with pets.

Automatic self-cleaning

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Once the vacuum cleaner is placed in the docking station, simply press the appropriate button to start the automatic cleaning process. In about two minutes, the device thoroughly rinses the roller and internal hoses, reducing the need for manual debris removal. This feature helps maintain proper hygiene and prepares the device for its next use.

Two Separate Water Tanks

The ULTENIC AC1 Triflex is equipped with two independent tanks, ensuring that clean and dirty water remain completely separate. The 800-ml clean water tank provides the right amount of liquid needed for cleaning floors. The 450-ml dirty water tank, on the other hand, is equipped with a special solid waste separator (Solid Baffle) and a “Press and Lift” removal system, which allows you to conveniently separate hair, pet hair, and food debris from the liquid without having to come into direct contact with the dirt.

Intelligent Voice Prompts

The device informs the user about the currently selected operating mode, when charging begins, and when the self-cleaning function needs to be activated. Thanks to voice prompts, using the vacuum cleaner becomes even simpler, and all the most important information is available in real time. The intuitive control panel allows you to quickly switch between available functions.

High-Capacity Battery and Long Runtime

The battery used in the AC1 Triflex model allows for up to 60 minutes of runtime without needing to recharge. This runtime is sufficient to thoroughly clean an area of up to approximately 250 m². The cordless design increases freedom of movement and makes cleaning more convenient.

Included in the set

- ULTENIC AC1 Triflex upright vacuum cleaner
- Handle
- Cleaning roller
- Sponge filter
- Cleaning brush
