PROSCENIC P15 Cordless Upright Vacuum Cleaner

The PROSCENIC P15 is a cordless upright vacuum cleaner equipped with a 600 W brushless motor, a maximum suction power of 50,000 Pa, and a high-capacity battery that allows for up to 70 minutes of runtime. The device offers three operating modes, a spacious 1.2-liter dustbin, a six-stage HEPA filtration system, and a telescoping wand that makes it easy to clean hard-to-reach areas. Thanks to its lightweight design, a wide range of accessories, and the ability to quickly convert it into a handheld vacuum, the PROSCENIC P15 is ideal for cleaning floors, carpets, upholstered furniture, stairs, car interiors, and under furniture.

Powerful Motor and Three Operating Modes

Its high performance is driven by a modern 600 W brushless motor, which ensures stable suction power even during extended use. The vacuum cleaner offers three power levels, allowing you to easily adjust its performance to the type of dirt and surface. Floor mode provides suction power of

up to 30,000 Pa, Carpet mode reaches 40,000 Pa, while Turbo mode delivers a maximum of 50,000 Pa.

Long runtime and convenient charging

The battery, consisting of eight cells with a capacity of 2,200 mAh, allows for up to 70 minutes of uninterrupted operation. This makes it possible to thoroughly vacuum an area of up to approximately 230 m² without having to stop cleaning. An additional advantage is the ability to remove the battery and charge it both inside and outside the device.

Lightweight Design and Greater Freedom of Movement

The main body of the vacuum cleaner weighs just 1.6 kg, so using the device to clean higher areas requires little effort. The adjustable telescopic tube, which extends up to 112 cm, makes it easy to vacuum ceilings, curtains, blinds, and spaces under furniture. An additional convenience is the freestanding design, which allows you to safely set the device down at any time.

Effective removal of hair and pet hair

The brush is equipped with a special V-shaped roller that minimizes the buildup of hair and pet hair. The combination of soft and stiff bristles, along with additional rubber elements, improves the effectiveness of picking up debris from various surfaces. The brush's design reduces the risk of hair tangling by up to 99%, as confirmed by independent certifications from SGS (0% hair tangling rate) and TÜV Rheinland (99.58% hair collection efficiency).

Quiet operation with a noise level of 59 dB

The PROSCENIC P15 was designed with everyday comfort in mind, which is why it operates at a noise level of just 59 dB. This low noise level allows you to use the device without disturbing your family members or stressing your pets. The quiet operation also makes vacuuming in the evening or early in the morning much more comfortable.

Dual LED lighting for easier cleaning

The electric brush is equipped with a dual LED lighting system with a 120-degree beam angle. This feature allows you to spot small bits of dirt hidden under the bed, wardrobe, or sofa, even in dimly lit rooms. The lighting covers a much larger area than standard solutions used in traditional vacuum cleaners.

Advanced Filtration System

The six-stage filtration system effectively separates dust from the air and traps up to 99.99% of particles as small as 0.3 µm. In addition to the HEPA filter, the device uses, among other things, a foam filter, a steel filter mesh, and a cyclonic system. This solution helps reduce the amount of allergens and dust particles floating in the air.

Large dust container and convenient emptying

The 1.2-liter dust container reduces the frequency of emptying, which is especially useful when cleaning larger areas. The built-in mechanism allows for quick removal of accumulated debris with the push of a button. The dust container itself can be easily detached from the unit, making it simple to clean.

Versatile use at home and in the car

The PROSCENIC P15 can be converted from an upright vacuum cleaner to a compact handheld vacuum cleaner in just a few moments. The included 2-in-1 multifunctional brush and crevice tool allow you to effectively remove dirt from upholstery, shelves, corners, and car interiors. The manufacturer also offers the option to purchase an additional mini-electric brush designed to remove dust mites and thoroughly clean mattresses and sofas.

Included in the set

- PROSCENIC P15 vacuum cleaner body
- Battery
- Telescopic tube
- Floor brush
- 2-in-1 brush
