PROSCENIC F10 Ultra Electric Mop

The PROSCENIC F10 Ultra is a modern 3-in-1 electric mop that simultaneously vacuums, mops, and dries floors, helping to reduce the time spent on daily cleaning. The device features three operating modes, an automatic cleaning function, two separate water tanks, a self-propulsion system, and a high-capacity battery providing up to 60 minutes of runtime. Its fresh-water cleaning technology, the ability to remove both wet and dry dirt, 92% water recovery efficiency, and precise edge cleaning make the PROSCENIC F10 Ultra ideal for both apartments and larger homes.

One device for many tasks

The PROSCENIC F10 Ultra combines the functions of a vacuum cleaner, a mop, and a floor dryer. This allows it to remove dust, crumbs, spilled drinks, mud marks, pet hair, and other everyday dirt in a single pass. This solution not only saves time but also reduces the need to use several different devices.

Three operating modes tailored to different surfaces

The device offers three operating modes that allow you to adjust the settings to the type of dirt. Smart mode is ideal for daily cleaning and automatically adjusts power output to current conditions. Max mode is designed for stubborn dirt, while suction mode allows for quick cleanup of spills. This design makes the electric mop ideal for both refreshing the floor and thorough cleaning after cooking or playing with pets. A single device effectively removes various types of dirt without the need to change accessories.

Convenient Operation and Easy Maneuverability

The F10 Ultra model is equipped with a self-propelled motion assistance system that reduces the effort required to guide the device. This makes even longer cleaning sessions comfortable and prevents excessive strain on the wrists. An additional advantage is its ergonomic design and intuitive operation via a clear display. The mop can be tilted up to 170°, making it easier to clean areas under cabinets, beds, and other low furniture. The thoughtfully designed construction ensures freedom of movement and allows you to reach areas that are usually difficult to clean.

Thorough cleaning of edges and corners

The roller's design is engineered to effectively remove dirt along walls and baseboards. One side of the roller is exceptionally slim, allowing the device to reach areas less than 0.7 mm from the edge. This precision reduces the need for manual cleaning of hard-to-reach areas. This solution works especially well in the kitchen, bathroom, and entryway, where dirt often accumulates in corners. As a result, the floor remains clean even right up against baseboards and furniture.

Two Tanks and Effective Cleaning Technology

The device uses two separate tanks for storing clean and dirty water. The clean water tank has a capacity of 750 ml, while the dirty water tank holds 550 ml. This design ensures that the floor is cleaned exclusively with fresh water. The manufacturer has also incorporated an efficient moisture recovery system that achieves 92% efficiency. As a result, the surface dries faster, and the risk of streaks is minimized.

Automatic Cleaning and Long Runtime

Once cleaning is complete, simply place the device in the docking station and activate the automatic cleaning function. The system automatically rinses the roller and hoses, keeping all components clean and minimizing unpleasant odors. This makes daily maintenance of the device much easier. The built-in 6 × 2600 mAh battery provides up to 60 minutes of uninterrupted operation. This runtime allows for thorough cleaning of areas up to 230 m² without the need for recharging.

Easy-to-read display and voice prompts

The PROSCENIC F10 Ultra is equipped with a modern LED display that allows you to quickly check the battery charge level, the selected operating mode, and the device’s status. All key information is visible at a glance, which enhances the convenience of daily use. The intuitive interface means operating the device requires no complicated setup. Voice prompts available in several languages provide an added convenience. Users can easily customize the settings to their preferences and enjoy even greater convenience when using all the device’s features.

Included in the set

- PROSCENIC F10 Ultra electric mop
- Handle
- Charging station
- Power adapter
- Cleaning brush
- Cleaning solution
- User manual

Manufacturer	PROSCENIC
