

BenQ LW555C Standard throw projector 3500 ANSI lumens DLP WXGA (1280x800) 3D White

Model: 9H.JTY77.13E

Manufacturer: BENQ

EAN: 4718755098499

Product Code: 1276095

R15,816

BenQ Business Projector

LW555C | 3500 AL WXGA Laser Meeting Room Projector

Direct Connection to BenQ QOTA Cloud

With the optional DM01 dongle, the LW555C becomes a connected projector. The DM01's enhanced chipset allows seamless connection to the BenQ QOTA cloud, enabling firmware updates directly from the projector without using a PC or USB drive.

Firmware OTA

Support on-device firmware update

Expandable LAN Integration

Compatible with the optional DM01 dongle to provide an external RJ45 port for real-time firmware updates, with added wireless LAN connectivity

One Platform, Total Control

Manage Every BenQ Device with BenQ DMS

Once connected via DM01, monitor and manage all your BenQ devices through the BenQ Device Management System (DMS) software from your administration computer over your company LAN (DMS Local) — and stay connected even outside the office with the DMS App (DMS Cloud *). Gain complete visibility, centralized control, and seamless access from anywhere.

DMS Local

The IT Staff use a computer connected to the company LAN to control and manage all projectors directly within the office network.

DMS Cloud

By activating Agent Mode* in the DMS software, the local DMS system syncs with the DMS Cloud. (*In the future, projectors will be able to connect directly to the cloud without needing an Agent computer. This will enable real-time projector status updates. Stay tuned.)

Total Command

Manage all devices from one dashboard

Actionable Analytics

Monitor BenQ Devices status and performance data to make smarter decisions

Fast Setup

Onboard every BenQ device quickly before your meeting starts

Displayed exactly as intended

Selecting the right color mode ensures crisper, clearer images compared to a single default mode.

Presentation Mode

Optimized saturation for clear communication in slides, reports, and meeting content.

Video Conference Mode

Natural skin tones for a more professional look on camera.

High Detail Mode

Sharper contrast for diagrams, code, and blueprints.

DICOM Simulation Mode

Medical-grade accuracy when displaying digital images, with no loss of detail.

*DICOM Simulation mode is intended for training purposes only and not for medical diagnostic use.

High Reliability, Easy Maintenance

Laser Phosphor delivers up to 30,000 hours of reliable brightness with no lamp replacement.

Durable, efficient, and mercury-free for a more eco-friendly workplace.

Projection Fits for Every Room

Project images larger than 100" from just 3.3m~3.7m away (via 1.1X zoom), enabling easy big-screen viewing in rooms of any size.

Simplified Connectivity

The LW555C provides essential connectivity with streamlined ports, making setup effortless and ensuring reliable, cost-effective operation.
