MOES WCM-JD-T1 3MP Outdoor Wi-Fi IP Camera

The MOES WCM-JD-T1 is an outdoor IP camera offering 3 MP Ultra HD resolution, providing 24/7 monitoring in various lighting conditions. Thanks to WDR technology, the image remains clear in both dark and overexposed scenes, improving detail visibility. The camera connects to a 2.4 GHz Wi-Fi network and is equipped with a dual antenna for a stable connection, while its IP65-rated housing ensures resistance to dust and weather conditions.

Continuous monitoring and clear night vision

The device enables 24/7 monitoring, offering two night vision modes—classic infrared mode and full-color mode with additional lighting. As a result, the camera not only captures images after dark but can also serve as a light source in the surrounding area. A wide 79° field of view and adjustable settings (180° horizontally and 60° vertically) allow you to tailor the viewing area to a specific location.

Smart detection and alarm system

The camera uses human silhouette detection, which helps reduce the number of false alarms. You can set motion- or sound-based alarms, and the built-in siren activates automatically when an event is detected. Additionally, you receive real-time push notifications, allowing for a quick response no matter where you are.

Two-way communication and remote access

The built-in microphone and speaker enable real-time conversations via the MOES app or the Alexa control panel. From your smartphone, you can monitor live video, take photos, record video, and manage camera settings. The app interface offers quick access to features such as playback, the gallery, and image settings.

Efficient storage and compatibility

The camera supports H.264 and H.265 compression, with H.265 significantly reducing memory and bandwidth consumption. Recordings can be stored locally on a 32 GB, 64 GB, or 128 GB microSD card or in the cloud (paid service with a trial period). ONVIF compliance enables integration with NVRs and other surveillance systems.

Additional features and wide range of applications

The WCM-JD-T1 model offers the ability to define activity zones, set alarm and lighting schedules, and grant access to other users. The camera is suitable for various locations, such as gardens, home entrances, garages, or commercial spaces. Thanks to stable connectivity and remote access, you can monitor your property from anywhere.

Included

- camera
- USB power cable
- power adapter
- screws
